POWER has a DARK SIDE™

DUBLUZN™ GRAPHIC TECHNOLOGY

THE DUB™ DARKSIDE™ -5	2-PIECE DOUBLE BARREL COMPOSITE	2¾"	EUT7DBDS5	30" 31" 32"

In 2026, we Introduced a completely new generation of composite performance with The DUB™, Easton's uniquely designed double barrel. This first of its kind and innovative double barrel construction offered USSSA players what they want the most; maximum performance, unparalleled feel, and an unmistakable sound. Its unique barrel construction combines a thinner, lower compression outer barrel to create more barrel flex across the length of the entire barrel, with an inner barrel to govern performance directly at the USSSA allowed limit. In its second generation, The DUB™ continues to dominate fields with the same great feel and sound in an all new look.

- **2X Double Barrel Construction:** Easton's patented double barrel technology combines a lower compression outer barrel with a lightweight and durable inner barrel. The outer barrel provides more barrel flex across the length of the entire hitting surface and the inner barrel governs performance directly at the performance limit. This revolutionary technology results in the lowest barrel compression of any USSSA bat, with more barrel flex and a higher performance across the length of the entire barrel.
- **DARKSIDE Decal:** Where two worlds collide, The DUB™ DARKSIDE™ features DUBLVZN™ graphic technology that unearths a hidden world below the ultra-chrome top layer with each swing. Can you hit your way to the Darkside?
- **Swing Weight:** Balanced design feel, best for all players who want maximum bat speed and performance
- **ConneXion Max®:** Utilizes an elastomer connector to interlock the handle to the barrel, reducing vibration for optimal feel
- **Opti-Flex™ Handle:** Driven by ongoing research and feedback from some of the game's best players, each bat size's handle flex is specifically engineered to the elite travel ball athlete

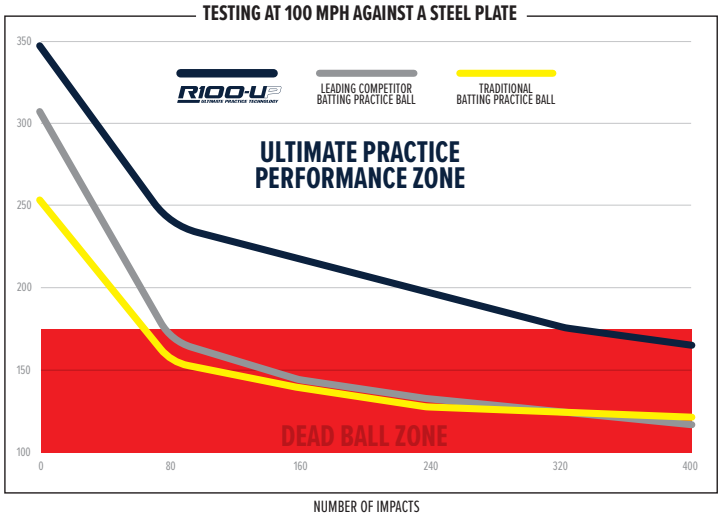
R100-UP™
ULTIMATE PRACTICE TECHNOLOGY™

Practice longer with a ball that's strong enough to keep up with you. The Rawlings® Ultimate Practice Baseball™ is designed to have a game-like feel, but last through hit after hit after hit—no matter the field conditions.



Balls tested at 100 miles per hour against a steel plate for 400 impacts. Compression measured after every 80 impacts. Compression refers to the pounds of force (lbs) necessary to compress the ball ¼ inch.

ADDED LIFESPAN
3X more durable than a traditional baseball.

WEATHER RESISTANT
Molded cover minimizes weight gain due to moisture.

EASIER TO CLEAN
Hard non-porous surface makes it much easier to clean than a traditional sewn baseball

RED DOT™ 3-PIECE TECHNOLOGY

A step above competitor's 2-piece softballs: that is why the best players in the nation choose Rawlings® softballs. The inner core uses Rawlings' proprietary dense cell formulation, creating a ball worthy of being the Official Championship Softball of the NCAA® and NAIA®. With the addition of the C-LOK™ adhesive and moisture barrier, the improved pro-leather cover with just the right amount of tack, there is no wonder why Rawlings has a rich tradition in fastpitch softball.

Balls without Rawlings® C-LOK™ barrier and poly-core combination can absorb moisture and lose compression (get softer).

C-LOK™ barrier plus Rawlings® proprietary dense cell poly-core technology repels moisture and maintains higher compression.

DREAM SEAM® HIGH-DENSITY CORK

For teams wanting the distinctive sound and feel of cork, Rawlings offers a complete line of NFHS®, USA Softball™, USSSA®, NSA® and ISC™ cork game balls. Made of high-density cork and Rawlings® Dream Seam® technology, they offer the performance you demand while giving a lower cost option in game balls.

RIF® TRAINING BALLS

Rawlings was the originator of RIF® balls designed to reduce the severity of ball impact injuries. Since the original RIF® game balls, Rawlings has expanded its offering to practice-level soft-training balls. These products are great for outdoor as well as indoor training.
