The image is a dark, monochromatic composition. The background is a close-up of a shoe sole with a complex, textured pattern of small, raised rectangular shapes. In the foreground, several white, perforated strips are arranged in a fan-like pattern, pointing towards the center. These strips have a regular grid of small circular holes. The word "CLEATS" is centered in the middle of the image in a bold, white, sans-serif font.

The background features a dark grey, almost black, color palette. It is decorated with several thick, white, geometric lines that intersect to form various shapes. A prominent line runs diagonally from the top left towards the bottom right. Another line runs diagonally from the top right towards the bottom left. These two lines intersect in the center. A third line runs horizontally across the bottom, with a slight upward curve on the right side. In the bottom center, there are three parallel, slanted white bars that resemble a barcode or a stylized logo element.

# YOUTH UNIFORMS

The background features a dark, textured black area on the left and top. On the right, there are several overlapping, semi-transparent grey and white geometric shapes, including a large triangle and several parallel lines, creating a dynamic, architectural feel. At the bottom, there are three white, slanted rectangular bars of varying lengths, resembling a stylized staircase or a modern logo element.

Earliest requested delivery date will reference the Start Ship Date (which is the date the Customer is expected to take possession of the order) and may vary by order type such as, but not limited to, (a) future, (b) fill-in, and (c) closeout orders. Customer delivery dates that do not meet requirements may be adjusted at the Company’s discretion. Orders must also meet minimum quantity requirements by product division (e.g., footwear) as established and communicated by the Company, unless otherwise agreed to between Company and Customer. Orders will be managed through a confirmation process where the Company evaluates Customer-requested delivery dates at the time of order integration against Company (a) current supply availability or (b) End-to-End lead times, and the Company provides a Confirmed Customer Delivery Date. Delivery performance will be targeted and evaluated against this realistic confirmed delivery date.
