PRODUCT CATALOG

Our Story

- BattleSkin LLC was formed to meet the needs of today's active lifestyle.
- A high school wrestler suffered a serious MRSA skin infection. Devastated, his coach started to investigate how this could have happened. It was uncovered that wrestlers did not like applying the greasy and difficult to apply products available on the market to combat skin infections.
- Thus, BattleSkin was successfully launched in 2015.
- The goal? To develop an attractive, easy to apply formula that targeted many skin health issues. BattleSkin quickly became well known in the close quarter combative sports.
- We now offer many products available to protect skin and personal health.

GOLD PRODUCTS

The BattleSkin Gold Formula

HOW IT WORKS

BattleSkin's active ingredients are known to prevent, protect and treat skin infections at a rapid pace. Our research team has created the perfect blend that give speedy results and optimum performance.

BENEFITS OF BATTLESKIN

- 1) BattleSkin is safe for use on the skin.
- 2) BattleSkin contains a proprietary blend of FDA approved active ingredients. These ingredients have been widely evaluated within several peer reviewed studies. Herein referred to as Active Ingredient A and Active Ingredient B.
- 3) BattleSkin's active ingredients are known to cleanse the skin against microbial agents.
- 5) BattleSkin's active ingredients are known to assist in the healing process in wounds, 2% of the active ingredients are used for wound irrigation in patients. The basis for our product is 70% ethyl alcohol.
- 6) BattleSkin's active ingredients have a residual effect on the skin flora up to 6 hours.
- 7) BattleSkin's active ingredients are recommended in surgical rooms for scrubs and washes with the concern of various skin microbial infections that range from bacterial to fungal.
- 8) BattleSkin is known to treat and prevent most skin infections including Bacterial, Viral and Fungal.

Benefits and Uses of Active Ingredient A and B

BattleSkin's active ingredients have been widely used due to its broad- spectrum efficacy, safety-profile and substantively on the skin with low irritation. It has been found to possess a high level of antimicrobial activity and strong affinity for binding to skin and mucous membranes. BattleSkin's active ingredients are widely used as a disinfectant in a broad range of healthcare products from wound care, burn care, urology lubricants, hand washing.
