This style utilizes **Recycled Polyester (PET)** developed from clear plastic bottles. **Americans buy 29 billion plastic water bottles each year.** For every six bottles bought, only one is recycled. This is problematic as these bottles are not biodegradable. It takes at least a thousand years for every single bottle to decompose, leaking pollutants into our soil & water along the way. **Our i3007 has an average of 1.2 recycled plastic bottles in a single cap.** By purchasing this style, you are helping to reduce the harmful effects of pollution on our planet.

The i7045 is constructed of a poly/spandex blended material with irregular twists throughout the fabric. This process in manufacturing is what gives this style the intriguing & popular "slub" pattern. The moisture wicking properties of this cap paired with the adjustable hook & loop closure, ensure that this hat feels as good as it looks.
