#### EMBRACING CHALLENGES

If you're reading this, it means you've survived another difficult year. Inventory shortages, staff shortages, logistics challenges, factory shutdowns – we've seen it all over the past two years. But if you're reading this, it means that, like Cap America, you took the challenges of 2021 and turned them into opportunities.

By summer of 2021, Cap America was already on track to surpass our previous record-breaking year of 2019. Sure, we were facing the same inventory shortages as other suppliers, but this gave us the opportunity to enhance our best-selling 30 Day Door-2-Door custom overseas program. With this program, we were able to get cap orders into our customers' hands quicker than most suppliers could receive stock, so we decided to invest heavily in it. We added fabrics and decoration techniques, worked closely with our overseas partners to negotiate the best prices and production times, and expanded our in-house Overseas Department to better serve our customers. The program is now more robust than ever and just waiting for you to take advantage of it.

As customers like you navigated to our website to find answers regarding available stock, production times, and order status, we noticed that our current website was not meeting your needs. It was time to make another investment, and I think now is the time to finally announce that we will be upgrading our website for an enhanced eCommerce experience. Coming early this year, our new website will allow you to view live inventory levels, track your order, and design and order caps all with the click of a button. We pride ourselves on our customer service, but our team is only available eight hours a day, five days a week. Soon you will have full access to your order history, artwork, and more 24/7.

We encountered the same frustrations as everyone else over the past year, but we were able to turn them into successful ventures that will help us and customers like you grow to the fullest potential. We hope you will join us as we capitalize on the opportunities that emerge from the challenges we are sure to

Mark Gammon President & COO

face in the coming months. Relying on a steadfast and trustworthy partner is more important than ever, so let's grow together in the coming months and enjoy another record-breaking year in 2022.

All the best,

# MULTICAM®

MultiCam® patterns take advantage of the way the human eye & prain perceive shape, volume, & color. Since only a very small portion of the human eye perceives color, the brain does a lot of "filling-in" for the eye. The unique high resolution design of MultiCam® takes advantage of this principle & helps the observer to "see" the pattern as part of the background.

# MADE FROM RECYCLED WATER BOTTLES

This style utilizes Recycled Polyester (PET) developed from clear plastic bottles.

Americans buy 29 billion plastic water bottles each year. For every six bottles bought, only one is recycled. This is problematic as these bottles are not biodegradable. It takes at least a thousand years for every single bottle to decompose, leaking pollutants into our soil & water along the way.

Our i3007 has an average of 1.2 recycled plastic bottles in a single cap. By purchasing this style, you are helping to reduce the harmful effects of pollution on our planet.

### **DEFINING** HEADWEAR

### Basic terminology used for our cap styles

**PROFILE** Refers to the crown height of the cap above the visor. There are generally 3 types of cap profiles:

► Low Profile ► Medium/Mid Profile ► High Profile

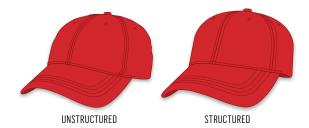

**STRUCTURE** A baseball cap can have buckram or stiff fabric behind the front two panels of the crown giving it structure & therefore it is called a structured hat. An unstructured cap has no additional support behind those front two panels. If you take a cap off your head & set it down on a flat surface, a structured hat will continue to look the same & generally keep its shape. An unstructured cap will collapse slightly without your head in the hat supporting it.

**CLOSURE** Adjustable baseball caps have closures on the back of the caps that allow you to adjust the size. Types of closures include:

- ► Adjustable plastic snap tab, sometimes referred to as a snap back
- ► Fabric strap with two piece hook & loop closure
- ► Stretchable hook & loop closure
- ► Fabric strap with antique sliding buckle

FLEXFIT® An icon in its own right, Flexfit the One & Only Original® cap has elevated the urban, lifestyle, & sports market with its revolutionary all-around stretch-fit technology & polished style. Available sizes are generally XS, S/M, L/XL and XXL.

### **PRODUCTION**

Standard delivery for in stock orders with embroidery is 3 working days after sample approval. Rush orders are accepted only if the production schedule allows.

### PRE-PRODUCTION PROOFS ON IN STOCK HEADWEAR

Applicable set up charges such as disc or screen charges will be invoiced when pre-production proof is approved. Proofs for orders will be virtual unless a shipping number is provided.

### **OVER-RUNS/UNDER-RUNS**

Every effort is made to ship exact quantities; however, a 5% over or under variance will be considered complete & billable. A \$40.00(A) charge applies to orders requesting an exact quantity & purchase order must indicate as such.

### **FABRIC COLOR VARIATIONS**

Due to color variations of dye lots, exact color matches of material are not guaranteed. In camouflage patterns, variations may occur in the placement of certain areas of the pattern due to random cutting. Certain distressed materials will have shading variations.

### **IMPRINT COLORS**

Color matches are not guaranteed to be exact, whether PMS colors or color swatches. All materials print differently; therefore, there may be a variation of print colors on orders of different materials or colors. When decorating on camouflage, no guarantees can be made that the pattern will not interfere with decoration (i.e. a branch, leaf or bark may fall behind decoration). Cap America is not responsible for fabric bleeding which may occur when imprinting a light color on a dark fabric. It is not recommended to place a white imprint on a red or black cap because the imprint may have a pink or gray hue. Distressed materials in all colors have a tendency to bleed into light colored embroidery threads & prints.
