DOLLAMUR® High Performance Foams

High Performance Tri-Flex® EVA Foam

The Ultimate in Speed, Rebound and Shock Absorption

The Tri-Flex® floor is unlike any foam floor surface you have ever used before. Foam layers of various densities are fused together providing extraordinary speed, rebound and shock absorption. Dollamur's exclusive cross-linked Standard foam and EVA foam provide height and airtime that cannot be touched by any other mat on the market.

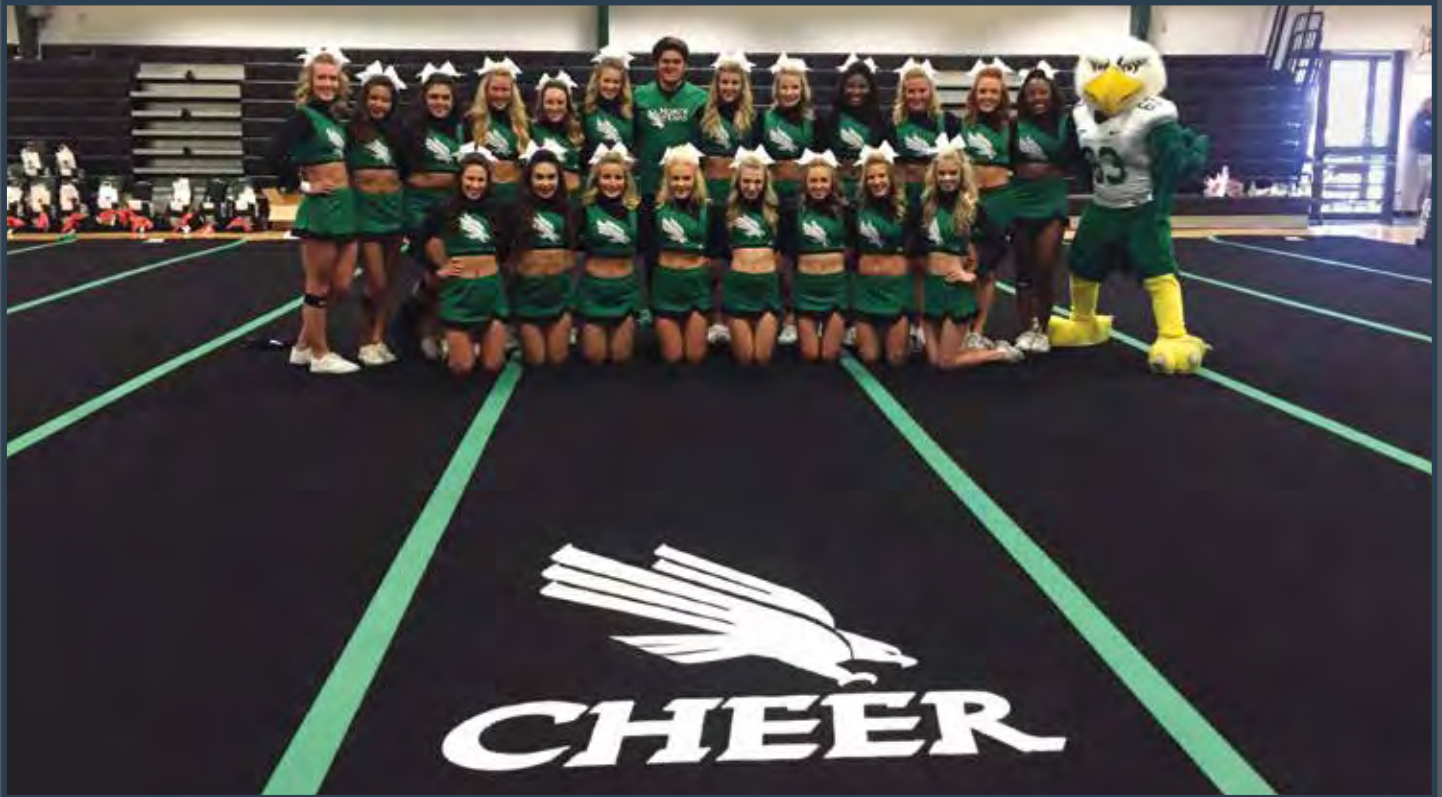

Standard Cross-Linked Polyethylene Foam

The #1 Choice of Competitive Cheerleading Squads in the U.S.

Dollamur Cheerleading mats are manufactured using high performance closed-cell, cross-linked polyethylene foam. Cross-linked foam does not break down from repeated bending or compression and will outlast other mats made with cheaper, non cross-linked foam.
