Boomer Fulcrum Sled:

Fulcrum: (Webster's definition)

- a. the support about which a LEVER turns.
- b. one that supplies capability for action.

Quite simply put, this is the perfect definition for the perfect sled.

- Realistic fulcrum pivoting action conditions your players to achieve leveraged power over an opponent without losing their balance
- The only sled that is completely adjustable
- Adjust spring tension, pad height and angle

Expandable:

Individual components allow stations to be added as the need arises. Basic sleds can start with 2 man capability and expanded as you desire. A 5 man sled can be easily broken down to a 2 and a 3 man sled.

Blocking units:

Each individual blocking unit is made up of "pigs" and pads. The "pig" is constructed with a high strength 1/4" steel plate, double welded for maximum strength and durability. The "pig" attaches to the steel chassis and is fully adjustable. Our exclusive spring tension adjustment is an integral part of each "pig". The pad fits onto the "pig" and is fully adjustable.

- A must for younger players just learning the game
- Eliminates coming off the L.O.S. flat footed, heel placement first, raising up, over-striding, getting feet too close together, and stepping in the center of the body (wt. 15 lbs.)

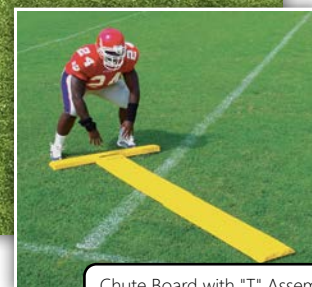

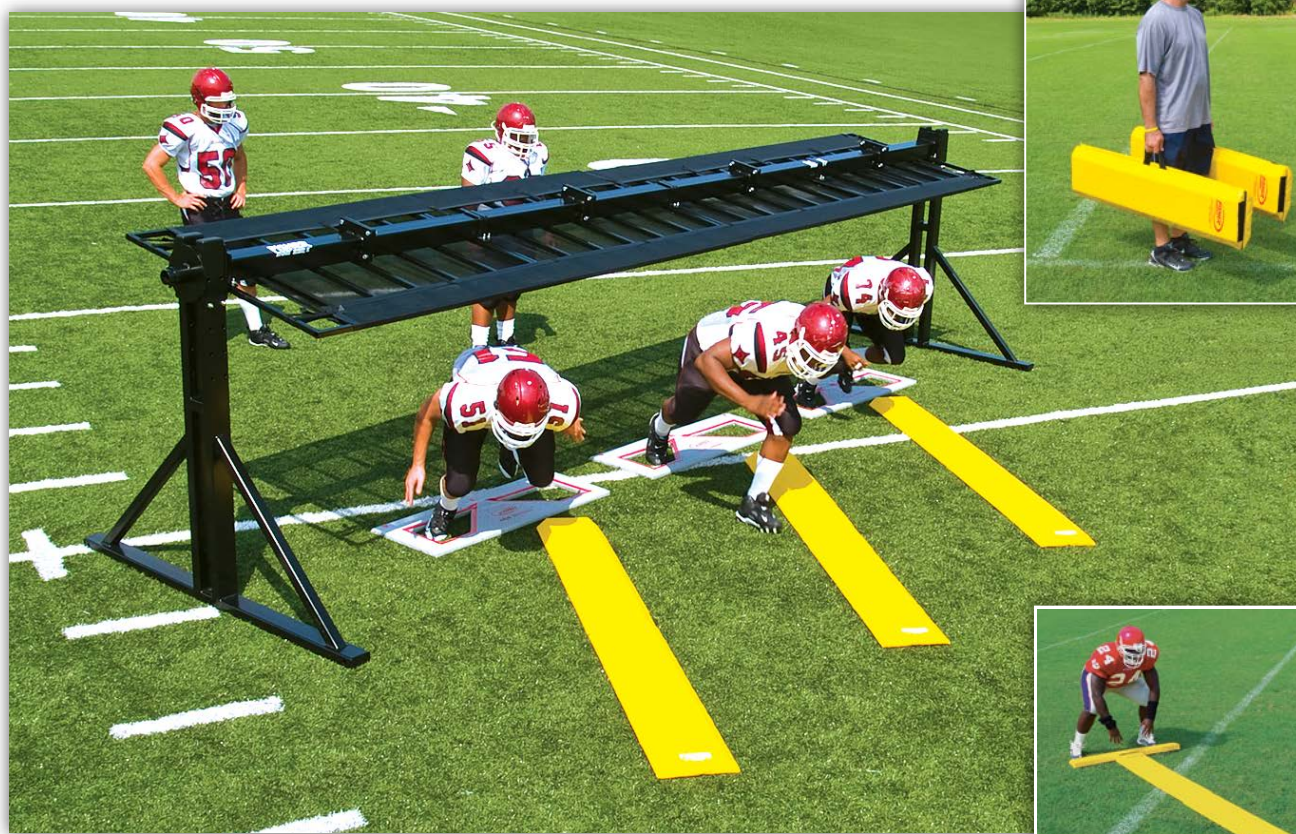

- Create a 6" power step that will force players to come off their toes, not their heels or flat footed
- Forces players to step at a 45° angle for slants and position blocks (reach block, cut off block)
