14 oz															
18 oz															
22 oz															

\*\*\*Color varies based on weight and type of vinyl

**GRAPHICS:**  Yes  No **Details:**

**CUT-OUTS:**  Yes  No **Details:**

**MEASUREMENTS WERE TAKEN FROM:**  Floor  Top of Baseboard  
 Height of Baseboard \_\_\_\_\_

When measuring a wall, the more details given the better. Begin by determining how tall & wide the wall to be paneled is. (Standard is 72 inches High x 24 inches Wide or 72 inches High x 48 inches Wide). Indicate if you are measuring from the floor or from the base board for

cut outs & art. Top and bottom of each cut out should be included in your sketch, also include how far in the cut-out starts. Do not assume large openings are straight, give top and bottom distances for these opening.

# Mounting Systems

## Z-Bracket

## Nailing Lip

## Z-Bracket

Z-Brackets provide an easy option for mounting panels to walls. They are optimal for both outdoor or indoor mounting and allow the panels to easily slide into place for quick mounting and unmounting. This is a great option if you are planning on taking your panels down after the season and putting them back up next year. This will prevent damage and maintain the life span of the panels.

## Nailing Lip

Each panel will have a 1 inch nailing lip on top and bottom. This method will require 4-drill holes. 2 at the top and 2 at the bottom of each pad, used to attach to the wall. This is a more permanent solution. The panels can be taken down by removing screws holding them in place. This will result in leaving drill holes in the panels nailing lips.

**“U” Channel**

**Hook and Loop**

**INDOOR NON-WOODBACK USE ONLY**

**“U” Channel**

“U” Channel is another option. It requires mounting hardware that will stay in place on the wall. The panels can drop in from the top and this allows for easy mounting of the pads. It is recommended to use a 1 inch nailing lip at the top of the pad for added stability.

**Hook and Loop**

The Hook and Loop method is only for indoor applications. Hook and Loop is sewn onto the removable non-wood backed pad. The opposing hook and loop piece will be attached to the wall for easily installation and movement. Hook and loop fasteners, consist of two components: two lineal fabric strips which are attached to the opposing surfaces to be fastened.

# **Rail Pads-RPG**

Protect your athletes from the hard, sharp edges of rails and other obstructions with rail padding. Padding gives your facility a finished look and added safety. We provide padding for fences, rails, and poles. We also offer custom manufacturing to meet your facility's unique needs. Padding is available in 18 colors and standard and custom

sizes. Logos and text options are a great way to upgrade your venue, advertise, and promote your school and sponsors. Vertical Post Pads and Square Rail Pads are ideal for art work. We offer multiple installation methods including pipe strap and "C" clamp, grommet flaps and hook and loop for easy installation.

## **Rail Pad w/ Grommets - RPG**

Rail pads are grommeted down the sides, used for ease of installation on round railing. Closed cell foam is used to ensure durability. Rail pads are available in 4', 6', 8', 10' sections. Custom sizing is available upon request. Standard pads fit 1-1/2" to 2-1/2" diameter rails.

## **Vertical Post Pad - RPGV**

Covers made with grommets. Standard pads fit 1-1/2" to 2-1/2" diameter rails. Vertical Post Pads are manufactured to your specific needs and sizes. Vertical post pads feature a rectangular design for upright posts. A cleaner look for areas with joining pipes. They are covered in 18 oz coated vinyl.

RPG188.....96" Grommeted	RPGVSO.....Vertical Pad Special Size

# ***Rail Pads-RPSW***

## **Square Rail Pad - RPSW**

2" Poly foam is used to ensure durability. Square rail pads are available in 4' to 8' sections. Custom sizing is available upon request. Pads are mounted with mending plates & c-clamps. Measurements are taken from the inside of the pads. Inside dimensions of 4" front x 3" top x 3" back make outside dimensions of 8-3/4" front x 10-1/2" top x 6-3/4" back.

**PCAPS****Permanent Corner Covers - PCAP**

Wood backed P-CAPS made with grommets. Sealed on 3 sides with the 4th side attached to the the rail. Standard pads fit 2" to 3" rails. P-CAP Pads are manufactured to your specific needs and sizes. They are covered in 18 oz coated vinyl. Caps can be designed to extend over rail top to accomodate for finials.

***Chain Link Fence Pad***

This specialty pad is 13" wide x 10', 12', or 14' long with grommets every 6". Made with 1" closed cell, high density foam padding and 18 oz. vinyl that comes in a variety of color choices. These can also be made in custom sizes to suit your every need.

# Mockup Samples

Mockups are created by the measurements given. Please be as specific as possible when requesting art work. Mockups are broken down into sized pieces and displayed as if it were one solid run of padding.

If a high enough quality image (300 dpi) is provided it is possible to do a rendering of the pads, on the image. There are no measurements provided on this rendering due to the fact this will only provide a general idea of the pads appearance.

As you can see the final product resembles the rendering. Colors and final positioning vary due to screen and quality of photo. A variety of artwork can be applied to the pads from custom logos and infinite color combinations.

# Backstop Pads

## Backstop padding comes in 4 styles:

Wood Backed Padding (WPS)

Wood Backed with “L” shaped top (PSMS)

Non-wood Backed w/ Grommets (EWM)

Non-wood Backed w/ Grommets along with 2’ wide folding sections and 2”-3” foam (BSP)

EWM and WPS series padding can be mounted to brick, concrete, wood or any solid surface, but also easily mounts to any chain link fence. The EWM series has brass grommets at the top and bottom for mounting. The WPS series padding is Wood Backed and is supplied with 1” nailing lips at the top and bottom. Optional “Z” or “U” channel hardware is available for mounting WPS series padding to solid surfaces. Nailing lips are not needed when mounting with “Z” brackets.

---

Attach Backstop padding to your fence to reduce bounce-back and protect your players while adding some school spirit to your field with custom graphic, school name, or mascot. Backstop pads are constructed out of 18 oz. vinyl in a variety of colors. Vent holes at the bottom of all pads allow for water drainage. Custom sizes are available in the WPS, PSMS and EWM series padding. BSPs come standard at 3’ & 4’ height. Widths vary from 6’, 8’, 10,’ to 12’. These are available in 2” and 3” foam. All padding is made in 2 foot folding sections for easy shipping and installation. If there are any questions or concerns about this item it is best to discuss the details of your order with one of our knowledgeable sales advisors.

---

According to **NCAA**, 3” backstop padding is always required. It should be a minimum distance of 25 feet and a maximum distance of 30 feet from home plate. It is recommended that the backstop be vertical and not extend over the playing field. When the backstop is wood, cement, or brick, it is strongly recommended that it be padded from dugout to dugout no higher than 1 foot off the ground and extending to the top of the wood, cement, brick or 6 feet from the ground, whichever is shorter.
