Shoulder + Chest Liner

The thinnest protection on the market meeting NOCSAE standard ND200 for protection against Commotio Cordis

Chest pad features RE ZRO technology, a fully biodegradable and 100% recyclable pad*

The shoulders and back of the liner features SmartFlex technology for low profile, body-mapped protection during play, providing mobility without sacrificing protection

Extra-wide elastic straps are adjustable and secure tightly for easy entry and a customizable fit

All panels are finished with durable materials, ensuring durability against the toughest plays

The interior of the chest protector is lined with a padded, logo print design, for added comfort and unique style

*Ask your local recycling authority if recycling facilities are available for this type of product. RE ZRO pads contain materials that have been independently tested for biodegradability. For information on biodegradability testing visit www.re-zro.com/material-testing. For more information please visit www.re-zro.co

IMPACT PROTECTION **REDEFINED**

Our SmartFlex technology offers flexible, body-mapped protection that hardens on impact, then returns to its original state. These waterproof, machine-washable pads keep you comfortable and dry.

RE ZRO®

THE WORLD'S FIRST BIODEGRADABLE IMPACT PROTECTION.

If RE ZRO products end up in landfill the TOTO-TOA® technology enables bacteria and microbes to colonize the plastic and feast on the carbon structures of the products, breaking them down fully into biomass and biogas, biodegrading within 3-5 years.

RE ZRO's consist of 'supermolecules' which absorb significant energy by fracturing and recombining during impact, resulting in powerful shock absorption. After impact, the supermolecules return to their ZRO state, ready for the next impact.
