LANDING SYSTEMS

For over 100 years, Gill Athletics® has kept coaches focused on their athletes with equipment they can take for granted. Our pole vault and high jump landing systems are engineered by collegiate athletes, professionals, and coaches alike. Both the NCAA® and NFHS® have partnered with us as we join to support every athlete's competitive journey and aspiration.

DOUBLE FRONT SYSTEMS

Available on G4, G6, and AGX M4. Call for Details.

SIDE CARABINER CONNECTION:

Top Pad is connected to base pads with carabiner side attachments, eliminating any obstruction on top of the pit. This exclusive attention to detail provides an obstruction-free landing area with athletes' safety in mind.

OPTIMAL PIT ENTRY ANGLE:

An ASTM approved vault box collar changes the slope of the tri-slant area when vaulting poles rotate. Gill's thoughtful pit entry design accounts for the box collar's effect by featuring a vaulter friendly angle.

GILL LANDING SYSTEMS FEATURES*

Top Pads

EDGE-TO-EDGE TOP PAD: Aesthetic and functional design eliminates spike contact with base units and unevenness at the edge of the pit. This Gill exclusive feature will increase the life of your new pit and improve safety near the edges.

TUFMESH PLUS™ CASING: Using exclusive 17 x 11 1000 denier material increases the life of your top pad and stands up to repeated use better than any other landing system.

2" DURALIFE™ FOAM: Soft and durable foam creates confidence in every practice. Coaches can teach with assurance because of this industry leading design.

V-LOOP VINYL STRAP: Designed to evenly distribute the force from the athlete's landing, V-Loop straps eliminate tears compared to traditionally designed pits that put undue stress on the seams.

REVERSIBLE: Extend the life of your pit, Gill's top pads are designed to use either side safely and easily.

Vinyl Base Units

ALL-VINYL BASE: Exclusive to Gill landing systems, this unique design keeps water out of your pit better than traditional mesh top units. To extend the life of your pit you keep water out of the foam. Gill's all-vinyl design gets results.

COMPLETE INTERCHANGEABILITY: Reversible sections for maximum interchangeability. This adds years to the life of your pit by maximizing the usage and size of the athlete's landing area.

QUADRUPLE DURALIFE LAYER FOAM: Athletes need to know they are landing safely and comfortably. Gill's new QUADRUPLE Duralife foam is 25% softer than others yet with firmness necessary for the safest landings.

DUAL COATED VINYL: Evenly distributed 1000 x 1000 denier polyester fabric is bonded on both sides with 18oz knife-coated PVC vinyl. This exclusive fabric design eliminates vinyl delamination seen in other pits after years of use. This creates the most durable casing that is lighter than the other pits.

STITCHING: Gill's entire landing system is stitched with the industry's strongest 210 bonded polyester thread. Simply put, your new Gill pit comes triple stitched with the toughest thread in the industry to hold up to high volume practices.

GRIP STRIP FASTENING SYSTEM: A pit is safest when constructed as an integrated system. Gill's Grip Strip Fastening System will keep your base sections functioning as one unit season after season.

ECO-SMART COMPRESS PACKS: Gill Athletics cares about the environment and your budget. All landing systems are expertly packed and shipped utilizing Compress-Pack shipping, reducing freight volume lowering fuel consumption and shipping costs. Pits restore to original size and shape minutes after unpacking.

12 YEAR WARRANTY: A long-term warranty is only as dependable as the company standing behind it. And after 100 years, you can count on Gill to stand behind your landing system for years to come. If any failure occurs in the first 12 years, under normal use and care, we will repair or replace the damaged part. Essentials line includes 5 year warranty.

CUSTOM COLOR AND GRAPHICS: Choose from over 100 unique vinyl casing and top pad color combinations offered at NO EXTRA CHARGE! Select your vinyl casing (xx) and top pad (yy) color combination. Add distinction with multi-color graphics on the top pad, weather cover, or both.

CONTINUUM™

THE WORLD'S FASTEST HURDLE IS ALSO THE WORLD'S SAFEST

CONTINUUM™ AUTOMATIC HURDLES

The Continuum™ hurdle is designed to be the safest, fastest, and most unobtrusive hurdle that the rules will allow, all accomplished by placing the gateboard directly over the pivot point (tip-over-fulcrum).

- Internal leg weight from Continuum looping mechanism creates the most reliable, hassle-free automatic hurdle
- Robust C4 & C5 hurdle frames feature reinforced gusseted elbows for unparalleled strength
- Exclusive extrusion gatetubes allow for graphic customization C4 & C5 hurdles.
- C4 & C5 hurdles utilize a unique inner leg vertical height indicator for no-mistake height settings (30", 33", 36", 39", 42")
- Internalized weight mechanism of C4 & C5 hurdles creates whole-unit hurdle reducing maintenance and upkeep
- *Meets NFHS, NCAA and World Athletics specifications*
- *5 year warranty*

OTEJAVELINS.com

OTE javelins are handcrafted in the USA, developed by master artisan, Dick Held. Dissatisfied with wooden javelins breaking after the first throw, he became inspired to build reusable, world-class javelins. Dick Held invented and perfected the modern aluminum javelin thrown today. It's that passion and performance potential upon which OTE javelin heritage stands.

JAVELINS

CARBON 1 COUNTERVAIL

Gill Athletics is privileged to continue our exclusive partnership with Countervail® to create the world's most technologically advanced javelin. The OTE Carbon 1 Countervail provides up to a 40% quicker damping rate which results in longer flights with minimal vibration and appears to "float" when thrown clean.

OTE 90

Handcrafted in the USA, the OTE 90 Competition is the same javelin Jan Železný threw to achieve his 98.48m world record back in 1996 – a record that still stands today. Invented and perfected by Dick Held, the OTE 90 now sports a nostalgic look in honor of that legendary throw.

APEX 80 70 60

The OTE Apex series was developed by Dick Held alongside the 90m javelin using the same principles. Perfect for the intermediate athlete who wants a softer feel during the throw while developing a cleaner release. The Apex series allows for more forgiveness and protection from injury.

HEADWIND (H) A headwind version of an OTE javelin describes a streamlined tip designed to help cut through the wind. This javelin tip, because of its small surface area, will have self-correcting characteristics when a thrower misses the point, adding valuable distance to a missed throw. The headwind version is ideal for 'power' throwers who lack perfect technique but make up for it with strength and torque.

TAILWIND (T) A tailwind version of an OTE javelin describes a thicker, more blunted tip that increases the surface area in front of the javelin. When a thrower hits the point with a tailwind version of an OTE javelin, it will mimic the old rules style javelins, with a beautiful floating flight and greater distances. This tailwind version is ideal for 'finesse' throwers who lack high outputs of power, yet throw at a high technical level.

CHOOSE YOUR JAVELIN

Use this chart for help on how to choose the best javelin.

ABILITY	BEGINNER → ADVANCED
DISTANCE	<30M → >80M
FLEX	12.6 (SOFT) → 4.4 (STIFF)
RATING	HIGH FLEX LOW DIST. → LOW FLEX HIGH DIST.

STEP 1:

SELECT JAVELIN WEIGHT

600g women's, 800g men's, or rubber tipped javelin.

STEP 2:

CONSIDER ATHLETE ABILITY

BEGINNER: Consider a "softer" more forgiving rated javelin like Tru-Flight.
 EXPERIENCED: Consider a "medium" stiffness that suits throwing style.
 ADVANCED: Consider a "stiffer" less forgiving javelin that maximizes distance.

VERSACOM BOXES

CONNECTING IT ALL TOGETHER

The *VersaCom Box* provides a junction for electricity and cable hookups. This box can be put in virtually any location around performance areas of varying surfaces. The open bottom of the VersaCom Box provides adequate drainage and conduit entry, while the hand holes in the cover allow easy access.

- Divider plates in full size version, provided to help keep electrical equipment segregated
- Main box structure is made of 1/4" thick folded aluminum
- Lid is constructed of 1/4" aluminum plates for maximum support and durability

The *VersaCom Box - Synthetic Version* allows material to be bonded or poured onto the top of the lid to match the surrounding surface.

The *VersaCom Box - Turf Version* features a supplied aluminum top to allow artificial turf to be glued on the jobsite, and is tethered to the box. This top is reinforced with multiple aluminum plates for maximum strength and durability. Factory installed turf infill retention brushes keep infill out of the box.

SAND PIT FORMS & COVERS

Sand pit forms hold more than just sand, they hold value. With four different options of Sand Catcher locations and two practical Sand Catcher Cover options, you can design the horizontal jump facility that will perfectly meet your needs.

No matter which combination you choose; with the Gill Functional-Form, you can rest assured it's the finest product (with the easiest installation) available.

Choose from one of two Sand Catcher Cover systems: traditional grate and mat or Gill (exclusive) Recessed Lid. When you consider the main function of a Sand Catcher system is not to catch sand but to store it, the Recessed Lid system is rapidly becoming the choice of facilities worldwide, as it is designed to receive track surfacing to match your track facility. When coupled with the 730148 Aluminum Sand Pit Cover, a complete logical design emerges for your world class jumps facility.

Choose from one of four sand catcher locations: no sides, two sides, two sides and back, or all four sides. Choosing Sand Catchers on the sides will cut unnecessary costs and eliminate potential trip hazards, providing more than ample storage space for overflow sand.

RAISED RUNWAYS

In the past, these types of runway systems have been priced upwards to \$75k! You can now have this product at a fraction of that price. The Gill Raised Runway allows for the flexibility to design runways that will accommodate the pole vault, long jump and triple jump for all levels of competition and practice.

The basic unit is an 8' x 4' general runway section. Specialized sections incorporate a vault box or take-off board trays and blanking lids. The construction of each section is welded aluminum, with ½" plywood decking. Track surfacing is not included, so you can have your preference on surfacing.

Adjunct products for the Raised Runway include the Soft Shell Sand Pit Form for the long and triple jump (sand not included), and a pole vault pit elevating system.
