OUR STORY BEGAN WITH A SIMPLE IDEA:

**CAPTURING PHOTOS AND VIDEOS
THE WAY YOU NEED THEM SHOULDN'T
BE COMPLICATED OR EXPENSIVE**

We believe that high-quality footage should be accessible to everyone, and we're committed to providing the tools that make it happen. Born from the belief that capturing the shots you need should be simple, impactful, and affordable, Hi Rise Camera is here to elevate your vision.

**DESIGNED.
ENGINEERED.
TRUSTED.**

At the heart of every Hi Rise Camera product is precision engineering backed by purpose-driven design. We use advanced manufacturing techniques and rigorous testing protocols to ensure every component performs flawlessly, even in the harshest conditions. From structural integrity to mechanical innovation, we engineer with one goal in mind: uncompromising reliability.

Our products are built with precision and intent - no shortcuts, no compromises. We source only premium materials, chosen for their strength, reliability, and performance in the field. This includes aircraft-grade aluminum, industrial carbon fiber, and other precision-engineered parts used throughout our systems. Each part is thoughtfully manufactured and assembled with attention to detail that reflects our deep commitment to quality. This isn't mass production - it's craftsmanship at its highest standard.

Our brand is trusted because we deliver on our promise — exceptional quality, innovation, and durability. Every Hi Rise Camera product is engineered to exceed expectations, and with a 10-year warranty backing our commitment to excellence, it's a promise you can count on.

SKY 250ET

SKY250ET-LC-HD / SKY250ET-LC-4K

The Sky 250ET tower is our legacy model, packed with features. With an aircraft-grade aluminum tripod and carbon fiber pole, it extends up to 21ft. Fully equipped with electronics, it's ready to use right out of the box—built to go where the action is and capture every second.

SKY 250NE

SKY 250NE-LC

The Sky 250NE tower offers the same high-quality structural components as the Sky 250ET tower, but does not include any electronic components. With a 21ft extension, it's perfect for adding your own electronics to customize your setup.

SKY 250PT

SKY250PT-LC

The Sky 250PT tower includes the same aluminum tripod, carbon fiber telescopic pole, and easy-spin base as the Sky 250NE. This model does not include any electronics or bracket components, designed for you to customize with your gear.

ONE TOWER. TWO FUNCTIONS. ZERO COMPROMISE.

When you choose an Air Series tower, you're getting the power of two systems in one. Skip the hassle (and cost) of juggling two systems from other brands.

Our Air Series delivers everything you need in one system. It functions as both a tripod tower and a portable monopod system. So you're always ready, whether stationary or on the move.

AIR SERIES TOWERS CONVERT TO MONOPODS

AIR 21 TOWERS

A real-life transformer! This 2-in-1 system can transform from a tripod tower to a portable monopod in seconds, offering the perfect balance of quality, stability, and portability—built to do it all. This model features an industrial-grade carbon fiber telescopic pole.

AIR 21ET - CARBON

AIR21ET-CA-HD / AIR21ET-CA-4K

The Air 21ET-Carbon offers dual functionality, converting effortlessly from a tripod tower to a monopod system. Featuring an aircraft-grade aluminum tripod and industrial carbon fiber telescopic pole, this 21ft system comes fully equipped with electronics—just unpack and get started.

AIR 21NE - CARBON

AIR21NE-CA

The Air 21NE-Carbon tower offers the same sturdy, high-quality structural components as the Air 21ET-Carbon, but does not include any electronic components. Extending to 21 feet, it's ideal for users looking to tailor the system with their own electronics.

AIR 21PT - CARBON

AIR21PT-CA

The Air 21PT-CA tower provides a sturdy aluminum tripod, carbon fiber telescopic pole, and easy-spin base like the Air 21NE-CA. This model does not include any electronics or bracket components, making it ideal for a fully personalized setup. Extending to 20 feet, it offers the versatility needed to create your personalized setup.

AIR 21ET - ALUMINUM

AIR21ET-AL-4K / AIR21ET-AL-HD

The Air 21ET is a versatile 2-in-1 system that quickly transforms from tripod tower to a monopod system. Engineered from aircraft-grade aluminum, this 21ft tower comes fully equipped with electronics for a true plug-and-play setup—ready to use right out of the box.

AIR 21NE - ALUMINUM

AIR21NE-AL

The Air 21NE tower offers the same sturdy, high-quality structural components as the Air 21ET, but does not include any electronic components. Extending up to 21ft, it's the ideal choice for users who want to customize their setup with their own electronics.

AIR 21PT - ALUMINUM

AIR21PT-AL

The Air 21PT tower provides the same tripod, telescopic pole, and easy-spin base as the Air 21NE, but does not include any electronics or bracket components, making it ideal for a fully personalized setup. Extending up to 20ft, it provides the perfect foundation for a custom setup.

INNOVATION AT YOUR FINGERTIPS

Our patent-pending handle bracket combines ergonomic control with a sleek, high-performance aluminum pan bar. For added flexibility, you can easily swap out the pan bar with the remote control, giving you the option to use it as a pan bar.

Whether capturing video footage or photos, this versatile design offers seamless control over your camera's functions, providing you with the flexibility to choose the setup that works best for you.

The tilt control cables feature smooth, self-retracting technology that allows for fast setup and takedown. Adjustments are nearly instant, with precision locking knobs that secure the tilt control cables exactly where you want them.

The handle bracket position can also be fixed in place, giving you confident control and smooth maneuvering when you need it most.

PERFORMANCE THAT PROTECTS

The camera housing & shield secures your camera at the top of your Hi Rise system, playing a key role in delivering smooth tilt and pan control. Its adjustable design accommodates both compact camcorders and larger camera bodies, providing reliable protection and performance you can count on.

Need more room? The removable shield easily adjusts to fit a wide range of devices—including Video Cameras, DSLR Cameras, AI Cameras, Phones, Tablets, and more. Whether you're using a compact or full-size setup, this smart design adapts effortlessly, giving you the freedom to switch setups with ease.

Shown without camera shield.

Cables can be placed inside of the cable chamber box, which securely slides onto the track of the camera housing & shield. This design eliminates stress caused by tension.

Its universal design protects cables and cable end ports while supporting a wide range of wired setups.

AIR 12 TOWERS

A real-life transformer! This 2-in-1 system can quickly transform from a tripod tower to a portable monopod system, offering the perfect balance of quality, stability, and portability-built to do it all. More compact than the Air 21 model, with all the same powerful features.

AIR 12ET - ALUMINUM

AIR12ET-AL-HD / AIR12ET-AL-4K

The Air 12ET Tower is a 2-in-1 system that seamlessly transitions from tripod tower to a monopod system, reaching up to 12ft. Designed with aircraft-grade aluminum and equipped with electronics, it's ready to go in minutes right out of the box.

AIR 12NE - ALUMINUM

AIR12NE-AL

The Air 12NE tower offers the same high-quality structural parts as the Air 12ET, but does not include any electronic components. Extending up to 12ft, it's the perfect choice for those looking to integrate their own electronics into a custom setup.

AIR 12PT - ALUMINUM

AIR12PT-AL

The Air 12PT tower provides the same tripod, telescopic pole, and easy-spin base as the Air 12NE, but does not include any electronics or bracket components. Combining strength with versatility, its design makes it ideal for personalized solutions.
