Custom Netting: All applications, all sizes, all the time.

JUGS Sports not only offers custom netting for baseball and softball, but for many other applications as well. Any dimension, all mesh and fiber sizes, and all strengths are available to fit your specific needs.

JUGS® now features both Polyethylene and Commercial Grade **POLYESTER batting cage netting.**

Twisted Knotted Black Polyethylene #27, #42 and #60 Batting Cage Netting Features and Benefits:

- Twisted Knotted Black Polyethylene Nets are hung on the square and are designed specifically for baseball and softball use.
- All JUGS nets come with a JUGS Hitter's Door for easy in-and-out access.
- Knotted nets have a higher overall strength and durability rating making them superior for direct impact sports like baseball and softball.
- Twisted netting has a higher abrasion resistance than braided, because twisted has less surface area than braided. This allows the balls to slide and spin off of the surface.
- Polyethylene netting doesn't absorb water—perfect for wet or humid hot climates—This is the best protection to prevent rotting.
- All JUGS nets are black and offer the best protection from the affects of sunlight—the darker the color, the greater the UV deflection.
- We incorporate the industries highest UV protection.
- JUGS netting is hydraulically depth stretched to improve knot tightness and reduce stretching and shrinking over time.
- Baseball and Softball size mesh—1¾".
- Heavy-Duty Polypropylene Black Rope Borders on top, bottom, and vertical corners. Rib-Line Ropes down the center for extra suspension points with less sagging.
- **1-Year Guarantee on #42 and #60.**

Commercial-Grade Twisted Knotted Black **POLYESTER #96 Batting Cage Netting—The Netting the Pros Use.**

Features and Benefits:

OUR TOP OF THE LINE NETTING

- **POLYESTER** available in one strength: **#96**
- Same great features and benefits as Polyethylene.
