**MSRP:** \$8.99 USD

**MD61004** Athletic Tape / 1.5" x 10 yds. / 4-Pack / Shrink wrap (White only)

**MSRP:** \$14.99 USD

## MD63325 Self Stick Tape

Provides compression and light support for muscles and tendons without sticking to or irritating skin.

- Can be used as an underwrap for traditional athletic tape
- Secures and protects bandages, and holds cold or hot packs in place
- Easy to cut and use, 90% cotton / 10% latex

**COLORS** >> Black

**Sizes:** 2-Pack, 2" x 5 yards per roll

**MSRP:** \$8.99 USD

**Clamshell Packaging**

## MD6330 Underwrap

Helps protect your skin throughout a workout or training, and it features lightweight foam construction for all-day comfort.

- Avoid skin irritation through a workout or training
- Can also be used as a hair tie
- Made of polyurethane foam

**COLORS** >> Black, Royal, Scarlet, Dark Green, Lime Green, Purple, Natural, Pink

**Sizes:** 2-Pack, 2.75" x 30 yards per roll

**MSRP:** \$6.97 2-Pack Shrink Wrapped; \$8.99 2-Pack Box USD

**Performance Carton**

## MD6650 HEX Skin Roll

Lets you apply HEX almost anywhere you need for advanced, custom protection.

- Best for body-to-body contact and body-to-surface contact
- Engineered to help protect the body from impact, burn, and abrasion
- Simply cut to length and apply direct to skin

**Warning:** Don't apply tape directly to an open wound. If skin area with pad turns an unnatural color and hurts, it's too tight — loosen it.

**COLORS** » Gray

**Sizes:** 1-Pack, 4" x 3'

**MSRP:** \$19.99 USD

Moderate to major instabilities  
Proactive injury prevention  
Post-surgical joint protection

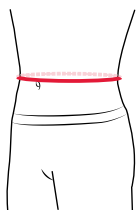

LEVEL **3+** MAXIMUM+

### Best for:

Major joint instabilities  
Post-surgical joint protection  
Therapeutic recovery

## MEASURE TRUE

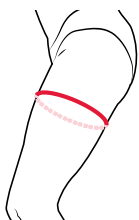

### WAIST

Stand with stomach relaxed (c'mon, you're among friends here). Measure the minimum circumference (skinniest part) in the waist area. Tape should be parallel with the floor.

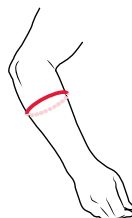

### WRIST

Keeping wrist straight, measure directly over joint, including wrist bones.

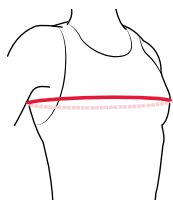

### THIGH

Stand and measure the maximum circumference (meatiest part) of your upper leg near the crotch.

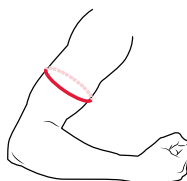

### FOREARM

With your arm slightly flexed, measure the fullest part of your forearm, typically midway between your wrist and elbow.

### CHEST

Stand and measure around the fullest part of your chest. Tape should be parallel with the floor. (No superhero chest puffing).

### BICEP

With your arm slightly flexed (remember, "slightly"), measure the fullest part of upper arm/bicep. When ordering a pair, take measurements of both arms and use the average of the results.

### KNEE

Measure the knee to be protected (you likely figured that). Stand and bend your leg just less than 45 degrees, measure around the largest part of knee, directly over the patella (kneecap).

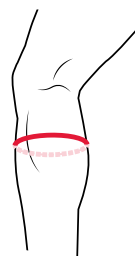

### FOOT

Measure circumference at center of arch directly over top of instep.

### KNEE

Stand and bend your leg just less than 45 degrees, measure knee circumference 2" (5cm) below the center or patella (kneecap).

### CALF

Stand and measure the calf in question (you knew this). Measure at the fullest part of the calf. When ordering a pair, take measurements of both calves and use the average of the results.

### ELBOW

Bend your elbow to approximately 45 degrees and measure directly over the joint. When ordering a pair, take measurements of both elbows and use the average of the results.

### ANKLE

Stand and measure ankle circumference 1"/2.5cm above center of inner ankle bone tip (the knobby bits). If you measure while seated, flex your foot slightly back toward yourself as you measure.
