**GREATNESS
IN SIGHT**

NIKE MAX OPTICS

- CLARITY
- PRECISE DEPTH PERCEPTION
- COLOR OPTIMIZATION
- REDUCE EYE FATIGUE

Every second counts. Max Optics Lenses are engineered to fuel your vision, giving you the clarity to see beyond the ordinary. Our cutting-edge lens technology is designed to sharpen every detail and bring color to life. With enhanced clarity, color vividness, and anti-glare coating, you'll see the game like never before. Featuring UV protection to shield your eyes from harmful rays and reduce eye fatigue, Max Optics lenses help you stay focused and perform at your best, no matter the length of the game.

This is more than just seeing the game, it's about seeing your best. With Max Optics, you don't just play— you elevate.

LENS TECHNOLOGY

PERFECT CLARITY
Our performance lens technology is designed to keep things clear, precise and comfortable no matter what conditions you're in.

UV PROTECTION
All our lenses offer 100% UVA/B protection.

NIKE MAX OPTICS PRO

Takes everything you love about Max Optics— and pushes it further. Engineered for athletes who demand precision in every moment, Pro lenses feature hydro-oleophobic coatings that resist water, sweat, and smudges, along with an anti-reflective coating—so your vision stays clear, even under pressure. Each lens is tuned for specific environments. Whether you're on the diamond, the course, or the trail, Max Optics Pro adapts with you— so you can focus on what matters most: your next move.

Stay locked in. Stay clear. **Max Optics PRO**

SEE THE GAME LIKE NEVER BEFORE

NIKE ROAD TINT

Road Tint lenses enhance red and green tones to improve terrain tracking and movement. An anti-glare coating cuts bright light, while the road-specific tint boosts contrast and depth perception. Blue light is filtered to reduce eye fatigue.

Made for long rides, fast runs, and every mile in between.

NIKE TERRAIN TINT

Terrain Tint lenses mute all colors except red to sharpen contrast and highlight trail details like roots, ridges, and sudden shifts. Whether you're running through the woods or riding downhill, they help keep your eyes locked in on the path ahead.

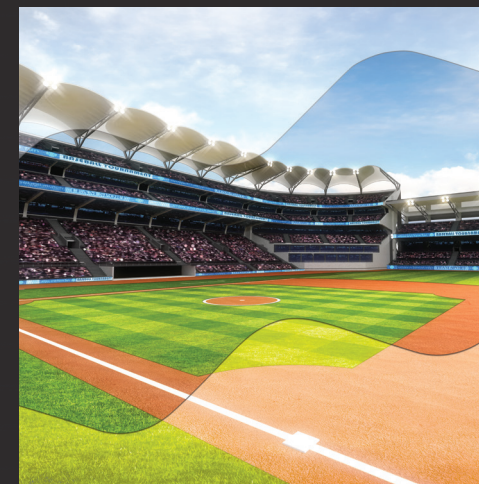

Perfect for trail runners, mountain bikers, and athletes who train where the path isn't paved.

NIKE FIELD TINT

Field Tint lenses are built to boost visibility even when the light drops. Designed for speed and precision, these lenses highlight bold colors like blue, orange, and white to help you track movement and react quickly.

Perfect for fast-paced, open-field sports where every detail matters.

NIKE COURSE TINT

Course Tint lenses are tuned for motion, enhancing red and green tones to help you track terrain and movement with precision. They reduce glare, sharpen contrast, and filter blue light to minimize eye fatigue—keeping your vision clear and focus steady, no matter the pace.

Built to go the distance without losing focus.

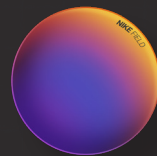

LENS USE SUMMARY

NIKE MAX OPTICS PRO LENS

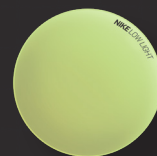

NIKE ROAD TINT

Cut harsh glare and highlight subtle changes in pavement, helping you spot hazards like cracks and potholes with confidence.

NIKE FIELD TINT

Boost contrast and make the ball stand out against sky, grass, and dirt while maintaining accurate color perception.

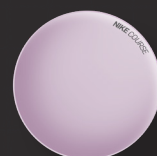

VOLT LOW LIGHT

Brighten surroundings and heighten contrast, helping you see details more clearly in dim or overcast conditions.

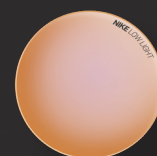

NIKE TERRAIN TINT

Balance bright sun and deep shadows to reveal texture and transitions, helping you navigate changing light and obstacles.

NIKE COURSE TINT

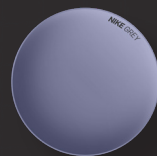

Enhance definition between fairway, fringe, and rough, making contours easier to read while keeping your eyes comfortable all day.

ORANGE LOW LIGHT

Sharpen contrast in low light while reducing blue tones and glare, giving you a clearer, more vibrant view.

NIKE MAX OPTICS BASE LENS

GREY

Reduce glare and eye strain while maintaining true-to-life color balance, providing coverage in a wide range of light conditions.

BROWN

Enhance contrast and depth perception while easing eye strain, making details appear sharper and clearer.

POLARIZED

Reduce glare off the snow, water and other flat reflective surfaces.

FRAME TECHNOLOGY

COVERAGE

Frame curvature ranges from everyday wear to full wrap-around for maximum protection and expanded peripheral vision.

PRESCRIPTION READY

Many Nike sunglasses are designed to be easily fitted with prescription lenses.

Innovation informed by athletes.

Nike performance eyewear is designed using the latest technology and real-time input from athletes to elevate your eyewear experience.

STABILITY

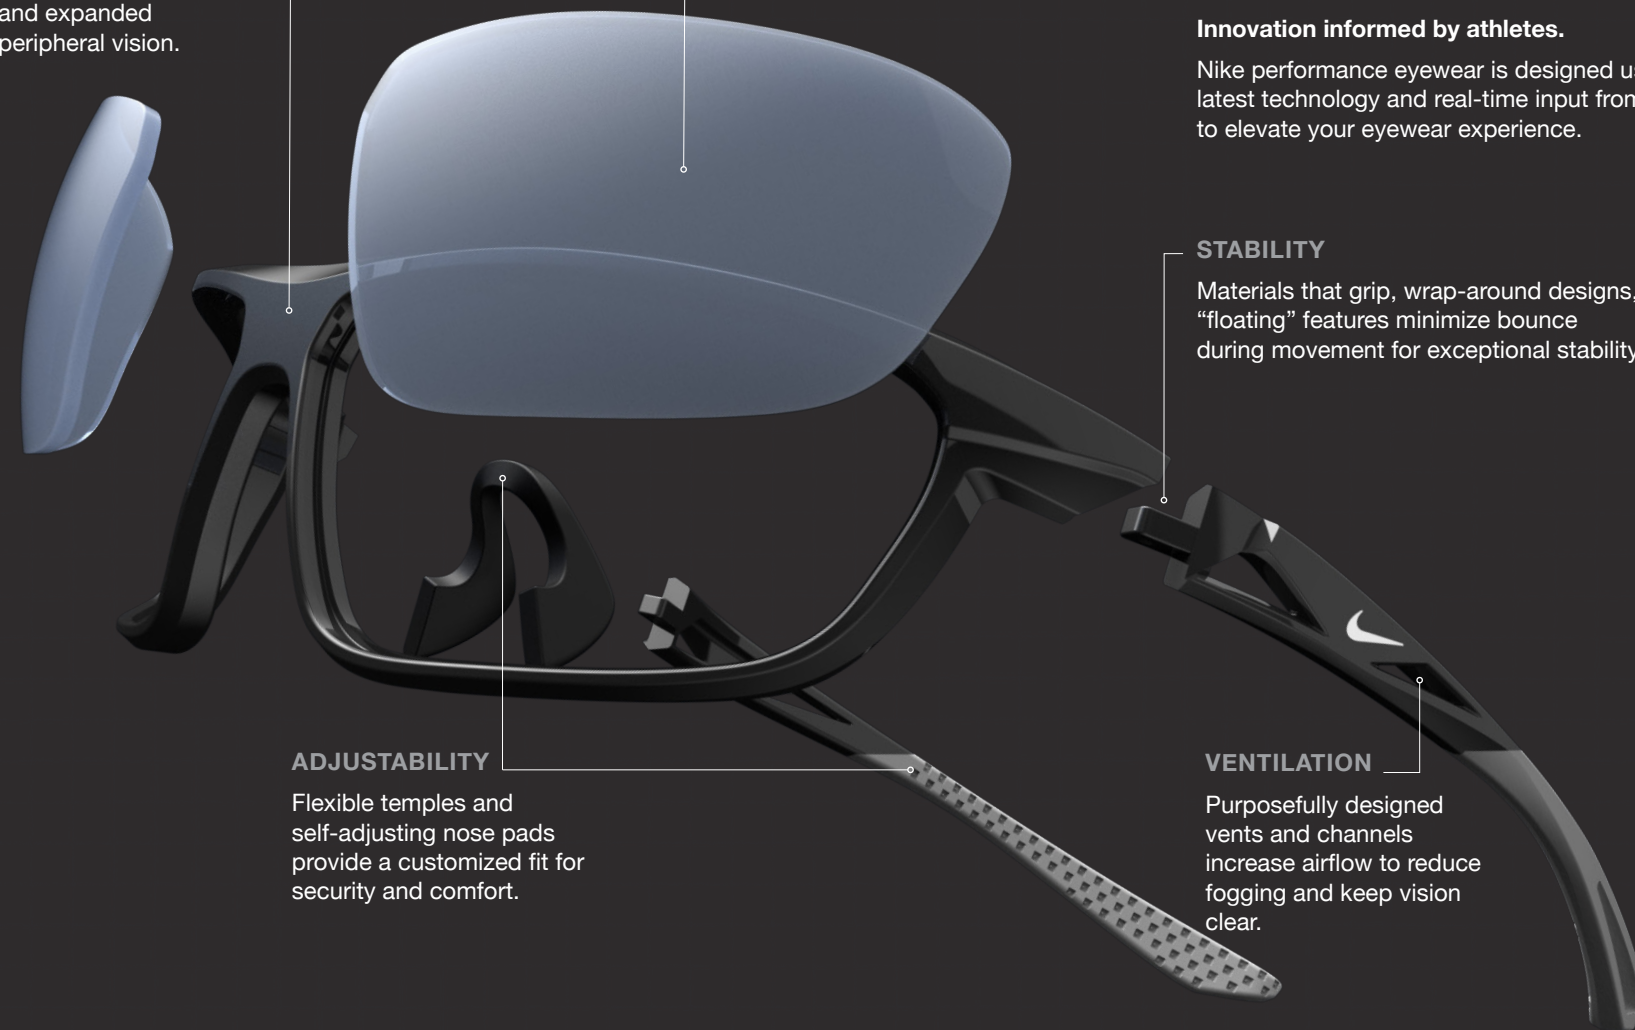

Materials that grip, wrap-around designs, and “floating” features minimize bounce during movement for exceptional stability.

ADJUSTABILITY

Flexible temples and self-adjusting nose pads provide a customized fit for security and comfort.

VENTILATION

Purposefully designed vents and channels increase airflow to reduce fogging and keep vision clear.

FLYFREE INTERCHANGE LENS SYSTEM

Take freedom to the next level with Nike's patented interchangeable lens technology that locks in with ease, keeping up from morning workouts to sunset runs. Delivering function that never quits, the Nike Flyfree Interchange Lens System is freedom reimagined.

MAX OPTICS FOR ANY ENVIRONMENT

Two sets of high-performance lenses to enhance vision in any condition.

SEAMLESS LENS TRANSITION

Swap lenses with ease. Just close the temples, open the latches and switch lenses to match any light condition--day or night. Then close the latches, open the temples and you're ready to go.

NIKE FLYFREE SHIELD

Built for pure performance with a panoramic shield lens that delivers wide, uninterrupted vision.

NIKE FLYFREE

Built for everyone, ready for anything—our most versatile performance frame yet.

RX compatible

NIKE FLYFREE SOAR

Built with a larger profile for extended coverage and protection from the elements.

RX compatible

NIKE FLYFREE INFINITY

Built for her, with a secure fit and all-day comfort to keep the focus on performance.

RX compatible

NIKE SHOW X RUSH TEAM

CHANGE UP YOUR GAME IN CONVERTIBLE COMFORT.

Find the form that optimizes your performance. The Nike Show X Rush Sunglasses feature an interchangeable design that lets you decide how you want to wear them. Snap off the top bar for no-distractions visibility. Easily insert clip-in prescription lens if you need it.

BENEFITS

- Nike Max Optics with anti-reflective coating helps reduce light reflection and provides precise vision from all angles.
- Nike Elite 1-piece lens has superior coverage and clarity.
- 6.75 base curved shield offers full coverage with peripheral light blockage.
- Floating nose pad enhances airflow and absorbs impact.
- Adjustable temples with rubber sleeves give enhanced grip and optimal fit.
- Ventilation increases airflow and reduces fog to keep vision clear.

PRODUCT DETAILS

- Injected frame material is derived from at least 40% castor bean oil
- Easily insert clip-in prescription lens
- 100% UVA/UVB protection
