Nike Vapor Elite 1

With an upper so light it practically disappears on your foot and Air Zoom cushioning so responsive you'll burst off the line of scrimmage, the Nike Vapor Elite helps you take over the game with indefensible speed.

- Lightweight Flyknit improves multidirectional containment and breathability.
- Responsive forefoot Air Zoom unit sits on top of the plate, offering extra pop and speed when making sudden movements.
- Vapor plate is lightweight, yet structurally strong.
- Built-in cables combine with the Flyknit to help secure your laces even tighter.
- Thin layer over Flyknit provides durability.
- Wide stud placement ensures optimal multidirectional traction.
- Molded plastic around the heel offers stability for your ankle and Achilles.

Nike Alpha Menace 4 Elite

When the clock’s ticking away and only a touchdown or defensive stand will do, the Alpha Menace 4 Elite can help you perform at the highest level. We kept everything you loved about the 3, like the strong plastic side cage for stability. But we also made updates based on input from pro superstars, like a revamped upper and more accessible lacing system. The result is a cleat that has you ready to change the game.

- Based on pro athlete feedback, we added synthetic leather to the upper for a better feel and more durability compared to the Menace 3.
- We removed the supportive layer over the lacing system as seen on the Menace 3. That way you can access your laces with ease when making in-game adjustments. You still get the same secure feel, thanks to the eyelets that pull through the midfoot.
- The plate is stiff in the heel and midfoot for stability. It's also responsive in the forefoot to help propel you forward. The strong plastic side cage on the upper also helps keep you stable.
- The sole's wide stud placement gives you traction for lateral moves. The X-frame on the bottom flexes naturally with your foot to provide stability during hard braking and quick cuts.
- A lightweight external knit collar gives you all-game comfort by hugging your ankle.
- Synthetic leather on the upper provides durability.
- Stretch-knit cuff wraps your ankle.
- Soft foam midsole provides lightweight cushioning and a close-to-the-ground feel.

Nike Alpha Menace 4 Pro

Whether you're toting the rock or speeding by your defender, the Alpha Menace Pro 4 is primed for playmaking and pad pops. Better durability and breathability throughout the upper compared to the previous iteration complement a cleat capable of suddenness, stuffs and stands when it counts most.

- An all-new molded plastic quarter cage in the upper offers great stability. Supportive synthetic leather helps keep your feet comfortable. Molding over the front makes it tough and durable on the field.
- A molded heel gives you a cool on-field look with a little extra support when you're getting off the snap.
- A mesh collar in the heel and mesh tongue offer better comfort and breathability compared to the Alpha Menace 3 Pro. Synthetic leather adds durability.
- The sole's wider stud placement compared to the previous iteration with traction on the edges gives you stability for lateral moves and helps support sharp changes of direction. The X-Frame on the bottom flexes naturally with your foot for stability during hard braking and quick cuts.
- We updated the carbon fiber plate from the Alpha Menace 3 Pro to make it stiffer in the heel and midfoot for stability, and more responsive in the forefoot for propulsion.

Nike Phantom Luna 2 Pro

Serious about your game? We made this for you. In the middle of the storm, with chaos swirling all around you, you've calmly found the final third of the field, thanks to your uncanny mix of on-ball guile and grace. Go finish the job in the Phantom Luna 2 Pro. Take your skills to the next level with some of Nike's greatest innovations, like a stretchy Flyknit upper and Nike Cyclone 360 traction to help guide your unscripted agility.

- A grippy overlay covers the striking area of the cleat, stretching from the big-toe side all the way across the laces to the pinky toe, allowing clean boot-to-ball kicks. The material helps give you control in damp and dry weather.
- Nike Cyclone 360 traction pattern helps you make quicker (improved agility when making cuts) and confident (helps reduce rotational traction) movements, so you can cut with speed while feeling fully secure when the game's intensity turns up.
- Asymmetric lacing offers a large touch surface when dribbling, passing and scoring. A repositioned lacing pattern allows for increased midfoot adjustability to accommodate players with flatter or higher arches. Asymmetrical Flyknit cuff material provides snugness and shape around your ankle. Subtle ribs in the cuff allow for ball contact higher up the ankle in trapping and passing.

Nike Mercurial Vapor 16 Pro

Serious about your speed? Pro cleats are for those who want to push the pace all match long. That's why we made these with an improved Air Zoom unit. It gives you and those devoted to the game the propulsive feel needed to break through the back line. Take your skills to the next level with some of Nike's greatest innovations like Flyknit on the upper, which makes the cleat even lighter so you can play fast.

- A tacky skin finish is geared for goals and maintaining control of the ball when dribbling at high speeds.
- The wave-like traction pattern is a series of cascading studs, so it engages more surface area of the Air Zoom unit while also providing the appropriate amount of grip. The biggest stud is the same height as our traditional middle studs, so traction is not compromised. We paired the wave-like traction with evolved chevron and blade studs to help you stop when making quick cuts.
- For the first time in Mercurial, we've developed a full Flyknit upper. It's tuned for the needs of the game and sent through the Mercurial filter, so it's engineered for speed. An incredibly lightweight, yet strong Flyknit on the side panels provides support and brings you closer to the ball.

Nike Tiempo Legend 10 Pro

Even Legends find ways to evolve. Made for those serious about their game, the latest iteration of these Pro cleats has all-new FlyTouch Pro engineered leather. Softer than natural leather, it conforms to your foot and works with All Conditions Control (a grippy texture even in wet weather), so you can dictate the pace of your game. Lighter and sleeker than any other Tiempo to date, the Legend 10 is for any position on the field, whether you're sending a pinpoint pass through the defense or tracking back to stop a breakaway.

- See those microdots on the upper? They amplify touch zones for shooting, dribbling and passing. They make for a sleeker look while taking out the extra padding. Even better, they don't sacrifice the ball control you crave on the field. We shaved down the foam pods from the Tiempo 9, so your foot can get even closer to the ball when it's in your control. Instead, we molded the lines into the cleat. All Conditions Control (ACC) technology adds a grippy texture in both wet and dry conditions.
- FlyTouch Pro engineered leather is incredibly soft. It helps the cleat mold to your foot for comfort without overstretching the material. A knit inner sleeve gives you a secure feel.
- The plate blends conical studs in the heel for optimal traction and stability when braking and changing direction, just right under any conditions.

SU25 NTS TRAINING-COACHING

HF1536 \$140.00

Nike Pegasus 41

The personal relationship you have with the Peg is unlike anything else. Faithful. Reliable. The pair that's always there, pushing the running world forward, while still putting your wants and needs first. With an always speedy Zoom Air engine on top of softer, more responsive ReactX foam the Pegasus 41 is quietly unlike any other Peg we have ever made before. A springy ride for any run, better for all runners on this planet, and all planets where we run.

- Nike ReactX foam is engineered to reduce its carbon footprint by at least 43% in a pair of midsoles due to reduced manufacturing process energy compared to prior Nike React foam.
- We paired Nike ReactX technology with 2 Zoom Air units (1 in the forefoot and the heel) to give you a bouncy, springy sensation and an energized feel at toe-off.
- We broadened the forefoot and heel width compared to the Peg 40. The extra room provides a stable, springy Zoom Air engine for that extra horsepower when you need it.
- The upper is made of an engineered mesh that's even lighter and more breathable than the Peg 40 to create an inviting feel and fit. The inner confines of the shoe are comfortable, breathable and forgiving in the toes, arch and heel, where your feet are most sensitive.
- Built with the same internal materials and padding as its predecessor the Pegasus 41 will hug your foot with an implemented midfoot band for a more secure but forgiving sensation. The midfoot strap for a more molded fit to the foot, shaped for all sized arches.

Nike Free Metcon 6

From power lifts to ladders, from grass blades to grainy platforms, from the turf to the track your workout has a certain purpose, a specific focus. The Free Metcon 6 supports every grunt, growl and “got it!” We added even more forefoot flexibility to our most adaptable trainer and reinforced the heel with extra foam. That means more freedom for dynamic movements during plyos and cardio classes, plus the stable base you need for weights.

- The more flexibility that you have in the midsole and outsole, the more you can move naturally. We laser-siped the outsole for better flexibility, whether you’re jumping, planking or powering through plyometrics. We also rounded the big-toe side of the forefoot for better agility and quickness when making sudden movements.
- The more supportive the shoe, the more stability it can give to your stance. A combination of tuned support and intentionally placed cushioning helps you feel secure with every step. We added more foam in the heel for improved stability when digging deep for another rep.
- The more cushioning that you have underfoot, the more comfortable your workout can be. Cushioning helps soften impact as your feet hit the ground. Laser-siped foam in the forefoot and midsole offers comfort.
- The upper is made of breathable, supportive engineered mesh with built-in stretch where needed, like lunging, squatting and jumping.
- Flywire cables give you a dynamic fit and help keep you secure during your workout.
- Multi-surface traction pattern is made for any workout surface and activity.
- Comfortable inner sleeve increases ankle support and provides a more seamless fit.

Wmns Nike Pegasus 41

Responsive cushioning in the Pegasus provides an energized ride for everyday road running. Experience lighter-weight energy return with dual Air Zoom units and a ReactX foam midsole. Plus, improved engineered mesh on the upper decreases weight and increases breathability.

- Upgraded breathable engineered mesh upper
- ReactX foam midsole surrounds forefoot and heel Air Zoom units for an energized ride.
- Signature waffle-inspired rubber outsole for traction and flexibility
- Plush collar tongue and sockliner for a secure and comfortable fit
- What's new? All-new ReactX foam midsole is 13% more responsive than previous React technology.
- Crafted for performance and planet, ReactX foam is engineered to reduce its carbon footprint by at least 43% in a pair of midsoles due to reduced manufacturing process energy compared to prior React foam. The carbon footprint of ReactX is based on cradle-to-gate assessment reviewed by PRé Sustainability B.V and Intertek China. Other midsole components such as airbags, plates or other foam formulations were not considered.

Nike Metcon 9

Whatever your "why" is for working out, the Metcon 9 makes it all worth it, with a larger Hyperlift plate, added rubber rope wrap and updated foam. Sworn by some of the greatest athletes in the world, intended for lifters, trainers, go-getters, it's still the gold standard that delivers day after day.

- We made the Hyperlift plate in the heel even bigger for better stability when getting after tough workouts like split squats, dead lifts and other lower-body exercises.
- The lace lock system attaches to the shoe tongue, so you don't have to worry about latching it to any fabric. It helps keep your laces in place, so once you tie up, you can focus solely on your workout.
- The rubber wrap is extended on the side and adds durability and support, so that you can scale any kind of rope climb with the same repeated velocity without worrying about wear and tear.
- Lightweight, breathable mesh helps keep your foot cool yet sports the kind of durability that can withstand scrapes, slashes and quick drag movements.
- Dual-density foam provides responsive cushioning for lasting comfort for continuous cardio and movements.
- Full rubber outsole provides durable traction for dynamic movements like cleans and walking lunges.
- Breathable textile has a haptic print, which creates a 3-D effect that adds durability and texture and helps make it easier to keep your shoes clean.

Nike Unicorn Crew

Once purely the subject of myths, this is the sock other socks dream about being. Inspired by the unicorns of sport—dynamic, versatile players that seemingly do it all—the Nike Unicorn is for anyone looking to take their game to a fabled level. This is our first sock to use our advanced sweat-wicking tech to help feet stay dry. Plus, Unicorn 3-D Spacer Knit adds cushioning and support where you need it. The Unicorn is unlike any pair you’ve seen before.

- Nike Dri-FIT ADV technology combines moisture-wicking fabric with advanced engineering and features to help you stay dry and comfortable.
- Unicorn 3-D Spacer Knit helps provide cushion, support and breathability around high-pressure areas such as the toe, heel and ball of the foot. It also helps provide support at the back of the heel and activates a wrapping sensation to help your foot feel locked in.
- The patented Circular Split Heel provides staying power that hugs your heel and helps to minimize slippage.
- The patented 360 Toe Lock helps keep the sock in place so you can focus on your sport or your workout.
- The checkered mesh pattern offers cushioning and a compressive feel for the back of the leg.

Nike Vapor 12

Get to every single ball with blistering speed in the Vapor 12. With a reworked upper and traction pattern, it's lighter and more responsive than the 11. And we brought back Air Zoom cushioning, so you can always be on the attack.

- A heel Air Zoom unit helps keep you supported and springy throughout your match.
- The herringbone traction pattern is made of our new rubber compound that's lighter than Vapors of the past. It allows you to decelerate, plant and back into position without feeling like you're rounding off your cuts.
- We brought back the firm midfoot plastic piece seen on past Vapors to provide optimal stability and transitions when cutting from side to side. The supportive piece also allowed us to remove the rubber in the midfoot, which helps reduce the overall weight of the shoe.
- A firm foot frame wraps around the supportive midfoot plate and spans from heel to toe, giving you more of a secure feel. It helps give you the stability to transfer power during aggressive slides, cuts and pivots.
- We reduced the weight of the engineered mesh while maintaining durability in high-wear zones by the toe.
- Full midfoot fit band allows you to pull the laces tighter to enhance the fit and enable faster cuts.
- Midsole foam in between the plastic and rubber, which wasn't on the Vapor 11, helps keep you light on your feet.

Nike Vapor Pro 3

The Vapor Pro 3 provides bounce and burst from side-to-side movements to scrambles to the net, so you can stay in the point. With springy Air Zoom cushioning and a new rubber compound that makes the shoe lighter than previous Vapors, it's primed to last to match point.

- The forefoot is more flexible because we shrank the Air Zoom unit and placed it where your foot feels the most impact. You still get responsive cushioning at the highest push-off point of your forefoot, but now there's more flex.
- The outsole is made of a new rubber compound that's lighter than Vapors of the past. It allows you to decelerate, plant and back into position without feeling like you're rounding off your cuts.
- We kept the same midsole foam and outsole pattern you loved on the Vapor 2 and improved the secure feel around the midfoot and heel for shaper cuts.
- The supportive forefoot piece has a deeper flex notch to improve flexibility.
- A full midfoot fit band helps you pull the laces tighter to enhance the fit and enable faster cuts.

How To Measure Foot Length

Tape a piece of paper to a hard flat surface, ensuring the paper doesn't slip.

Stand on the paper, feet shoulder width apart and weight evenly balanced (only one foot will be on the paper).

With a pen or pencil pointed straight down, have a friend or partner assist you by marking the tip of the big toe and the outermost part of the heel.

Once the marks are recorded, step off the paper and use a ruler or measuring tape to measure the distance between the two points. This measurement represents the length of the foot.

Repeat the process with the other foot. Please note that it is common for one foot to be slightly different length than the other.

Apply the longer of the two measurements to our size chart to find the right correlating size for the recorded foot length. If the measurement is between sizes, we recommend sizing up.

Height (in)	55 - 59	59 - 63	63 - 67	67 - 71	71 - 79

Nike shin guard sizes are determined by player height. The larger the shin guard size, the longer and wider they are to accommodate larger leg diameters. Shin guards should fit from just above the bend of your ankle when you flex your foot to a couple of inches below the knee.
