BASE JEWEL ARTWORK GUIDELINES

Follow these guidelines when providing us with in house artwork for jewels.

Provide Vector Artwork

VECTOR

Vector artwork is art that's made up of vector graphics. These graphics are points, lines, curves and shapes. Vector art can be sized up without losing print quality.

NOT VECTOR

Not vector art has very low quality and will appear pixelated on screen. This means we cannot size the art up without losing resolution and quality.

IMAGES

Images can be printed with excellent quality, but they require high resolution photos.

If you want to print an image or do not have vector art, please send the highest resolution jpg, png or image possible. Anything that has dimensions of 300x300 or a ppi of 300 or more is best. This will ensure you get the best print quality.
