THE NEW DUO TECHNOLOGY

INTRODUCING THE GROUNDBREAKING REUSCH-EXCLUSIVE

OUR NEW 3D-LATEX PATTERN ON THE INNER SIDE OF THE PALM FOAM BOOSTS THE TACTILITY, INCREASES THE IMPACT ABSORPTION AND AVOIDS ANY SLIPPING OF THE HAND INSIDE THE GLOVE.

51 70 050
Attrakt Duo Ortho-Tec
Page 16

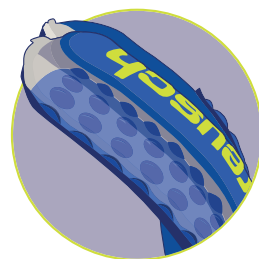

51 70 055
Attrakt Duo
Page 25

WHAT IS DUO ALL ABOUT?

This new technology is based on three-dimensional latex dots inside the super tacky Grip Gold match palm foam. The dots are directly connected with the hand and thus boost the ball control & tactility, increasing impact absorption, and preventing any slipping of the hand.

A brand-new pattern of many separate latex dots replaces the wave pattern of the original Duo technology. The individual dots massively add flexibility to reach new levels of comfort.

NEXT LEVEL CONTROL.

MARKET LAUNCH:
MARCH 26, 2021

THE POWER OF GRIP.

Special demands ask for unique solutions. With full focus on the goalkeepers and their different requirements on grip and durability, we have completely renewed our entire range of Reusch-exclusive palm foams. The German-made Reusch Grip latex builds the base for a total of 11 unique latex mixtures. All foams have been developed using unique compositions, additives and finishings that boost the performance of the product and the keeper.

This highly durable palm foam is perfectly suited for recreational goalkeeping on all types of pitch surfaces.

German-made palm foam that guarantees good grip and reliable durability thanks to a large proportion of high-quality natural latex.*

This very soft, high-percentage latex offers great grip and outstanding cushioning against hard shots.*

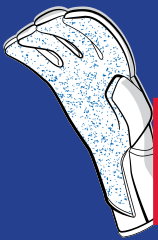

Great choice for hard ground and artificial grass thanks to its compressed latex with rough surface and high abrasion resistance.

DURABILITY BOOST

IMPACT ABSORPTION BOOST

* LATEX MADE IN GERMANY

ALL-WEATHER & DURABILITY BOOST

The first-choice latex of Lloris and Szczęsny provides unmatched grip and high abrasion resistance for all weather conditions and pitch surfaces.*

CONTROL BOOST

3D latex dots on the inner side of this high-grip palm foam prevent from any slipping of the hand and improve the tactility for maximized ball control.*

FRICTION BOOST

Three-dimensional spikes on the surface of this professional match latex increase the friction between the glove and the ball for maximum grip and control.*

Trusted by Samir Handanović and many other professional keepers, this exceptional match latex guarantees maximum grip and stickiness.*

ADHESION BOOST

GRIP BOOST

This premium match foam guarantees outstanding grip and reliable durability thanks to the addition of the largest possible amount of high-quality natural latex.*

This high-quality latex is the perfect combination of durability and grip for professional performances on artificial grass.*

DURABILITY BOOST

This match foam provides excellent grip in dry and especially wet weather and surface conditions thanks to its unique latex composition and our exclusive Hydrograin particles.*

WET WEATHER BOOST

CUTS:

EVOLUTION
NEGATIVE CUT

The latex is rolled around the fingertips for a tight fit, best ball control and maximized contact area. An inner-seam construction in the lower finger parts offers a tight, soft, flexible and ergonomic fit.

EXPANSE CUT

Outer seams enlarge the palm surface of this flat cut and so increase the latex-to-ball contact area.

SLIM
EXPANSE CUT

This brand-new cut is exclusively used on the Duo styles. Negative stitching on the backhand offers a snug fit, regular cut on the palm side provides the needed room to maximize the effect of the Duo technology.

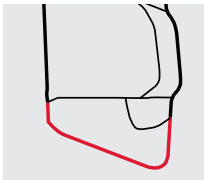

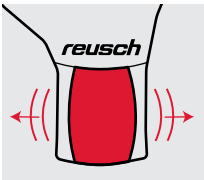

ROLL FINGER

The latex is seamlessly rolled around the fingers, providing the largest possible catching area.

CLOSURES:

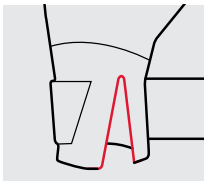

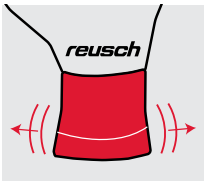

STEADY CUFF

In order to stabilize the wrist, provide the highest possible wearing comfort and create a smooth look, we extended the neoprene backhand all the way to the opening and merged it with a highly elastic textile on the inner wrist side.

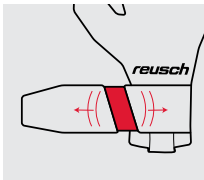

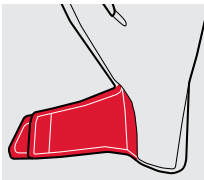

ELASTIC CUFF

This well-proven closure based on highly elastic textile guarantees great fit and additional wrist support.

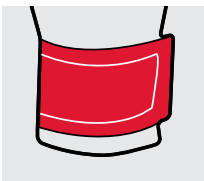

INTEGRATED STRAP

This light and flexible strap integrated in the glove body provides a quick and easy fastening and a stable hold around the wrist.

FULL STRAP

Our tried and tested fastening system all around the wrist for maximum stability and comfort.

ASYMMETRIC CUFF

Extended cuff on the outer wrist side offers added protection when coming in contact with the pitch surface on low dives. Elastic opening with highly stretchable lycra insert guarantees an easy entrance.

OPEN CUFF

A vertical cut on the inner side of the cuff makes entering the glove easier than ever before.

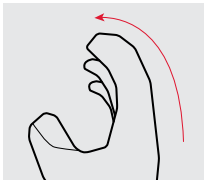

ELASTIC STRAP

Premium strap consisting of two pieces of latex and neoprene that are connected by a highly elastic textile insert. This special material-mix guarantees a highly precise and stable fastening.

FEATURES:

FREEGEL

Extremely light and durable punching zone made of silicone-like material, resulting in a very robust and at the same time highly flexible backhand.

WRISTGUARD

An impact absorbing latex patch protects the wrist when falling on hard surfaces.

PRESHAPED CONSTRUCTION

The anatomical shape of the glove and the slightly spread fingers enhance the glove's wearing comfort and support a natural catching position.

DURAGUARD

This latex patch offers extra abrasion resistance and durability in the most stressed zone of the palm.

VENTILATION CHANNELS

Strategically placed small holes in the latex gussets guarantee constant ventilation and cool hands.

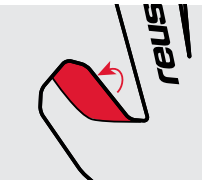

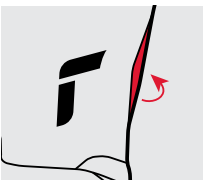

THUMBFLEX

A cut in the palm latex between thumb and index finger optimizes the flexibility of the thumb and the ergonomic shape of the glove.

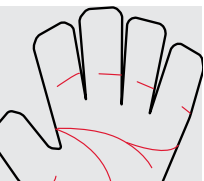

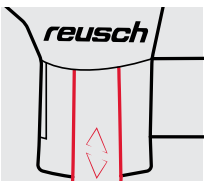

SIDE WRAP

A slightly wrapped construction of the palm latex on the outer side of the hand provides a snug fit and a bigger catching area.

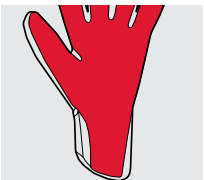

PULL LOOP

A textile loop on the inner side of the cuff ensures an easy entry into the glove. Helps keepers put their second glove on.

EXTENDED GRIP ZONE

The expansion of the palm latex all the way to the entrance significantly enlarges the latex-to-ball contact zone for optimized grip.

AIRVENTSYSTEM

Highly breathable mesh material ensures optimum air circulation within the glove, providing maximum ventilation.

3D THUMB CROTCH

This rolled crotch construction between thumb and index finger avoids bothering seams and supports an ergonomic fit.

THUMB WRAP

The palm latex wraps around the thumb to enlarge the grip area and create an ergonomic shape.

PALM EMBOSSING

Embossments following the natural lines of the hand support the natural grasping movement.

FINGER SUPPORT

This reliable finger protection system based on five protection spines reduces the risk of hyperextension while keeping the glove soft and flexible.

ORTHO - TEC™

Our premium finger protection system reduces the risk of finger injuries and offers great freedom of movement. Based on five individually removeable, lightweight and highly bendable protection spines, the Reusch exclusive Ortho-Tec™ system adapts to the natural movements of the fingers and keeps them from being pushed backwards into the injury zone. A super-stretchable neoprene opening on the backhand of the glove allows a quick and individual removal of each spine.

RELIABLE PROTECTION.
ERGONOMIC SHAPE.
UNRESTRICTED FLEXIBILITY.
FAST REMOVAL.

DID YOU
KNOW?

Each Ortho-Tec™ model comes with our handy EasyFix Tool that helps remove or replace the spines as quickly as possible.

STEP 1:
Place the EasyFix stick into the backhand opening and push it all the way to the fingertip.

STEP 2:
Insert the Ortho-Tec™ spine on top of the EasyFix stick and attach it to the velcro on the inside of the fingertip.

STEP 3:
Remove the EasyFix and get ready to dominate

G3 SPEEDBUMP™ FOAM By creating a 3D-structured palm foam of two G3 Ultrasoft layers, the geometrically placed SpeedBumps™ work as an additional barrier, raising the friction between the glove and the ball. More friction leads to better control and grip sensation.

ORTHO-TEC® This new ergonomic shaped Ortho-Tec™ spine allows natural movements before the fingers are pushed backwards into the injury zone. Free-floating protection spines can be removed for a custom fit.

EVOLUTION ESS CUT™ (Ergonomic Support System) A pattern and cut that helps splay the fingers to aid with catching.

AIRVENTSYSTEM™ keeps the goalkeepers hands cool and breathable with mesh material.

PROFLEX™ 4-way stretch technology.

3D THUMB CROTCH™ eliminates open seams with an ergonomic fit and maximum comfort.

EMBOSSED BACKHAND FOAM

KEEP CONTROL PRO™ the inside gusset on the small finger is constructed with highly functioning latex foam to help in catching and holding the ball.

ASYMMETRIC SLIP-ON CUFF™ provides wrist bone protection.

FULL STRAP with textile window and rubber ender.

ROLLED THUMB™ latex is extended around the inner side of thumb.

SUGGESTEDS RETAIL: \$190.00

SIZES: 7 8 9 10 11 12

MARKET LAUNCH: **IMMEDIATE**

Three-dimensional **SPEEDBUMP FOAM** spikes on the surface latex increases the friction between the glove and the ball for maximum grip and control. By creating a 3D-structured palm foam, the geometrically placed SpeedBumps™ work as an additional barrier, raising the friction between the glove and the ball. More friction leads to higher control.

FREEGEL™ silicone application on the backhand makes the glove highly flexible without reducing stability and control. Replaces our ShockShield™.

AIRVENTSYSTEM™ keeps the goalkeepers hands cool and breathable with mesh material.

PROFLEX™ 4-way stretch technology.

3D THUMB CROTCH™ offers rolled crotch construction, eliminating open seams with an ergonomic fit and maximum comfort.

A brand new **HIGHLY STABLE CUFF** construction offers perfect stabilization of the wrist, provides the highest possible wearing comfort and creates a smooth and modern look.

BACKHAND SIDE WRAP™ extends backhand material around side of the palm for extra durability.

ROLLED THUMB™ latex is extended around the inside of thumb.

PULL LOOP SYSTEM™ for ease of entry.

APPAREL

A MATTER OF PROTECTION, COMFORT AND STYLE.

CHARACTERIZED BY INTELLIGENT PROTECTION ELEMENTS, MODERN FITS AND DURABLE MATERIALS, THE HIGH-QUALITY REUSCH GOALKEEPER APPAREL LINE IS PERFECTLY SUITED FOR ALL TRAINING AND MATCH SITUATIONS. A REVISED RANGE OF FUNCTIONAL GOALKEEPER UNDERWEAR OFFERS MUST-HAVE PADDED APPAREL PIECES AND HIGHLY FUNCTIONAL UNPADDED FIRST LAYERS.

M M S™

MOISTURE MANAGEMENT SYSTEM

marks a terminology within functional apparel from Reusch. It's the common purpose of all MMS™ technologies. MMS™ is divided into following special fields:

MMS™ COOL: is integrated in shirts that have to wick away much moisture from the inside to the outside. Its focus is to keep the body comfortably cool even in extreme conditions.

MMS™ COMPRESSION: is used in shirts and shorts that fit tightly to the skin. The special run of the seams and the selection of appropriate material cause an effect of muscle compression, which prevents them from getting tired quickly.

MMS™ THERMO: is mostly included in neoprene styles. Especially in winter or in wet conditions it keeps the body warm to avoid muscle strains.

39 11 300 MATCH PRO PADDED GOALKEEPER JERSEY

SUGGESTED RETAIL: \$50.00 SIZES: AS AM AL AXL

31 02 016 REUSCH OVER-THE-KNEE GOALKEEPER SOCK

Inspired by professional goalkeepers from Central and South America. Top quality knitted foot with compression zones though the arch and fully shaped heel. Rear panel support knit enhances circulation though the calf area, and the special weaving process allows tremendous breathability. Flex Zone for knees at the front of the extended top of the sock ensure that the keeper has an extra layer of protection against scrapes, friction burns, and bruises.

NFHSQ

Our top game ball is made to FIFA approved standards. This match ball is **THERMO BONDED**, and has a top P.U. layer that has a microfiber backing that provides durability and top playability. The lining is 3-fold high quality viscose fabric layers with high quality foam layers to give this ball the soft feel and enhance its rebound. These layers also increase the ball strength and allow it to be a top playing ball in all conditions. We use a special seam sealing technology, Thermo Bonding, which effectively reduces the water absorption to nearly zero, so the ball can weather any playing conditions. The bladder is made of latex, where the valve being made of butyl rubber, keeps the air retention of this bladder very high.

M-200 37 75 300

NFHSQ

This 20 panel ball is made to FIFA approved standards. The ball panels are **THERMO BONDED** which keeps water retention to a minimum. It also limits any expansion of the panels, which then helps maintain a true round shape. This P.U. cover is embossed with a matte finish for better aerodynamics. The top P.U. layer has a microfiber backing that provides durability and top playability. The backing layers increase the strength and allow it to be used in all playing conditions. The bladder is made of latex, where the valve being made of butyl rubber, keeps the air retention of this bladder very high.

32 62 401 MICRO FIBER GOALKEEPER’S TOWEL

Stay dry and ready. In addition to containing a beautiful Reusch design, these 15"x15" collectable towels are soft, durable and absorbent. The lint-free terry type microfiber material is made of thousands of split fibers which allow the cloth to absorb liquid aggressively without being abrasive. They are safe to use on multiple surfaces because they are constructed from woven polyester / polyamide blend microfiber. In addition, the edges of the towels are sewn with over lock stitching which greatly increases the life of the towel. When cared for properly the towel can last hundreds of washings.
