OUR MAIN COLLECTION,
A FUSION OF INNOVATION AND EXPERTISE.

BE FRESH, BE VIBRANT, BE VISIBLE!

1 AdaptiveFlex Closure System

A two-layer construction consisting of a first elastic bandage around the wrist and a second layer resulting from an extension of the backhand fabric all the way to the opening. To provide flexibility, the upper layer is strategically cut on the back and the front of the wrist. This system stabilizes and supports the wrist while enhancing freedom of movement.

2 PerformSkin Fabric

This supple and flexible yet structured material offers increased breathability and volume for best wearing comfort.

3 Latex Punch Zone

Light and durable punching zone made of latex material, resulting in a very robust and at the same time highly flexible backhand.

4 Ventilation Channels

Strategically placed small holes in the latex gussets guarantee constant ventilation and cool hands.

5 Pre-Shaped Construction

The anatomical shape of the glove and the slightly spread fingers enhance the glove's wearing comfort and support a natural catching position.

6 Elastic Strap

Premium strap consisting of two pieces that are connected by an elastic textile insert. The special shape and material-mix guarantee a highly precise fastening.

7 Extended Grip Zone

The expansion of the palm latex enlarges the latex-to-ball contact zone for optimized grip.

8 Double Thumb Wrap

The palm latex wraps around the upper and lower side of the thumb to enlarge the grip area and creates an ergonomic shape.

9 3D Thumb Crotch

This rolled crotch construction between thumb and index finger avoids bothering seams and supports an ergonomic fit.

10 Thumbflex

A cut in the palm latex between thumb and index finger optimizes the flexibility of the thumb and the ergonomic shape of the glove.

11 Side Wrap

A wrapped construction of the palm latex on the outer side of the hand provides a precise fit and a bigger catching area.

LEVEL UP

FASTGRIP

• BE THE ONE •

DON'T BE DEFINED BY YOUR
OPPONENT'S PACE - **BE FASTER.**

1 AdaptiveFlex Closure System

Inspired by our patent pending closure system, we optimized the AdaptiveFlex for our second-skin fit construction. This two-layer system features an elastic bandage for unrestricted flexibility and an integrated strap on top wrapping around the wrist and providing reliable stability and fixation.

2 Hybrid Negative Cut

Negatively stitched glove construction with wrapped latex around the index finger and the pinkie for best ball control.

3 Second Skin Fit

Our lightweight, highly flexible, breathable and snug-fitting glove construction provides ultimate agility and thus maximum control.

4 PerformSkin Fabric

This supple and flexible yet structured material offers increased breathability and volume for best wearing comfort.

5 Double Thumb Wrap

The palm latex wraps around the upper and lower side of the thumb to enlarge the grip area and create an ergonomic shape.

6 Integrated Strap

The special construction of the glove's upper material around the wrist offers a secure fixation and boasts a clean look.

Extended Grip Zone

The expansion of the palm latex enlarges the latex-to-ball contact zone for optimized grip.

Side Wrap

A slightly wrapped construction of the palm latex on the outer side of the hand provides a snug fit and a bigger catching area.

Pull Loop

A slim textile loop on the inner side of the cuff ensures an easy entry into the glove.

Glove Cuts

Hybrid Negative Cut

Negatively stitched glove construction with wrapped latex around the index finger and the pinkie for best ball control.

Roll Finger Cut

The Roll Finger cut is characterized by the palm latex being completely rolled around the inner side of the fingers. This feature provides the largest possible catching area.

Evolution Cut

The latex is seamlessly rolled around the fingertips for a precise fit, best ball control and maximized latex-to-ball contact area. An outer-seam construction in the lower finger parts offers an ergonomic fit, breathability, softness and flexibility.

Evolution Negative Cut

The latex is rolled around the fingertips for a tight fit, best ball control and maximized contact area. An inner-seam construction in the lower finger parts offers a tight, soft, flexible and ergonomic fit.

Negative Cut

The backhand and palm of the glove are negatively stitched with gussets and sidewalls. Besides offering a smooth look, this specific design guarantees a snug fit and enhances ball control, delivering a natural feel to the keeper's hand.

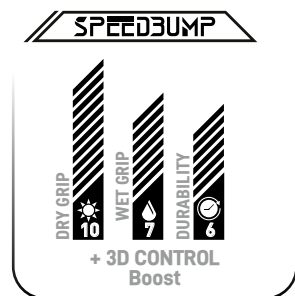

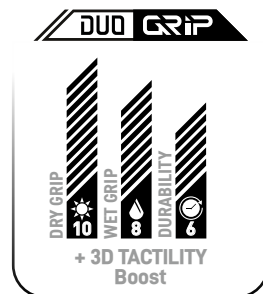

Expanse Cut

Outer seams enlarge the palm surface of this flat cut and so increase the latex-to-ball contact area.

Reusch Grip Latex

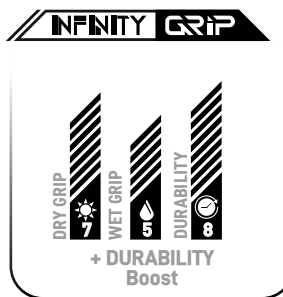

PRO

Pro palm foams refer to highly performing, Reusch exclusive foams combining our best latex in terms of grip with additional and special features to achieve exceptional performances.

ADVANCED

Advanced foams guarantee a very good grip suitable for competitive usage.

INTERMEDIATE

Intermediate palm foams deliver a very reliable grip that stands up to intermediate levels.

RECREATIONAL

Foams developed for recreational use that deliver very good performances in terms of durability.

FUSION GRIP

REUSCH GRIP FUSION Our Fusion foam is foam sprinkled with hard ground and soft ground foam for greater grip and durability. The first-choice latex of Lloris provides unmatched grip and high abrasion resistance for all weather conditions and pitch surfaces.

EVOLUTION NEGATIVE CUT The latex is rolled around the fingertips for a tight fit, best ball control and maximized contact area. An inner-seam construction in the lower fingers offers a tight, soft, flexible and ergonomic fit.

FREEGEL™ material mix on the backhand in new lean design. With a focus on the rubber element on the central knuckle area, the new Freegel™ application keeps the backhand light, soft and provides a more comfortable fit.

PRESHAPED CONSTRUCTION The anatomical shape of the glove and the slightly spread fingers enhance the glove's wearing comfort and support a natural catching position.

3D THUMB CROTCH™ offers rolled crotch construction eliminating open seams which tear more easily along with an ergonomic fit and maximum comfort.

VENTILATION CHANNELS Strategically placed small holes in the latex gussets guarantee constant ventilation and cool hands.

SIDE WRAP A slightly wrapped construction of the palm latex on the outer side of the hand provides a snug fit and a bigger catching area.

EXTENDED GRIP ZONE enlarges the latex surface area on the palm, enhancing grip and control for goalkeepers.

REUSCH GRIP ADVANCE Reusch Grip Advance palm foam offers an excellent balance of performance and durability on every surface. It is engineered to boost good grip properties in all conditions and to ensure reliable ball control in intense training and match situations. Designed for longevity, this palm foam withstands intense sessions on the pitch while maintaining its remarkable grip.

GLUEPRINT TECHNOLOGY The Attrakt Evolution GluePrint is based on the Reusch Evolution applying a special sticky print on the palm latex. The tackiness and grip get enhanced exactly in those zones where it is needed the most. The positioning of the ink follows a precise pattern that is designed to cover exactly those areas of the palm that get the most contact with the ball when catching.

EVOLUTION CUT The latex is seamlessly rolled around the fingertips for a precise fit, best ball control and maximized latex-to-ball contact area. An outer seam construction in the lower finger areas offers an ergonomic fit, breathability, softness and flexibility. This cut is characterized by a large catching area.

ORTHO-TEC

Attrakt Freegel Fusion Ortho-Tec **56 70 990**

FUSION GRIP

FUSION FOAM blends tough and soft ground materials for superior grip and durability, offering unmatched grip and abrasion resistance on any surface or weather condition.

REMOVABLE ORTHO-TEC® Our Advanced Protection System offers backhand, finger, and thumb protection. The Ortho-Tec® spine allows natural movements before fingers are pushed into the injury zone, and the removable free-floating spines provide a custom fit.

EVOLUTION NEGATIVE CUT The latex is rolled around the fingertips for a tight fit, the best ball control, and maximized contact area. An inner-seam construction in the lower fingers offers a tight, soft, flexible, and ergonomic fit.

STRETCHABLE NEOPRENE ENTRY POCKET Allows for quick, easy removal of Ortho-Tec® stays. Eliminates rigid zippers on the backhand of the glove.

FREEGEL™ Our Freegel™ punching zone made of silicone-like material makes the backhand highly flexible without reducing stability or control. This design has single non-connected elements of Freegel™, allowing better flexibility across the backhand.

PRESHAPED CONSTRUCTION The anatomical shape of the glove and the slightly spread fingers enhance the glove's wearing comfort and support a natural catching position.

AIRVENTSYSTEM™ mesh material provides optimum circulation, keeping the goalkeeper's hands cool.

ERGONOMIC EXTRA PALM EMBOSSING Embossing that follows the natural lines of the hand for optimal glove flexibility.

DURAGUARD™ Latex palm patch on the lower palm offers extra abrasion resistance.

3D THUMB CROTCH™ offers rolled crotch construction eliminating open seams which tear more easily along with an ergonomic fit and maximum comfort.

STEADY CUFF To stabilize the wrist, ensure maximum comfort, and achieve a sleek appearance, we extended the neoprene backhand to the opening and fused it with a highly elastic textile on the inner wrist side.

NEOPRENE STRAP With rubber ender. Allows very precise fastening.

ROLLED THUMB™ The palm latex is extended around the inner side of the thumb.

PULL LOOP SYSTEM™ for ease of entry.

LATEX GUSSETS provide optimum flexibility.

DUO GRIP

1130 white / gold

REUSCH GRIP DUO™ is our patented foam that combines groundbreaking technology with innovative 3D latex dots on the inner side of the highly grippy and tacky palm. This prevents any slipping of the hand and boosts the tactility and impact absorption for maxim ball control.

EVOLUTION CUT The latex is seamlessly rolled around the fingertips for a precise fit, best ball control and maximized latex-to-ball contact area. An outer seam construction in the lower finger areas offers an ergonomic fit, breathability, softness and flexibility. This cut is characterized by a large catching area.

PRESHAPED CONSTRUCTION The anatomical shape of the glove and the slightly spread fingers enhance the glove's wearing comfort and support a natural catching position.

PERFORMSKIN BACKHAND BASE This supple and flexible yet structured material offers increased breathability and volume for best wearing comfort.

FULL STRAP with textile window and rubber ender.

ELASTIC CUFF with Pull Loop entry system.

LATEX PUNCH ZONE Light and durable punching zone made of latex material, resulting in a very robust and at the same time highly flexible backhand.

GUSSETS Textile material ensures breathability and flexibility for enhanced comfort and movement.

AIRVENTSYSTEM™ mesh material provides optimum circulation, keeping the goalkeeper's hands cool.

3D THUMB CROTCH™ offers rolled crotch construction eliminating open seams which tear more easily along with an ergonomic fit and maximum comfort.

SIDE WRAP™ A slightly wrapped construction of the palm latex on the outer side of the hand provides a snug fit and a bigger catching area.

THUMB WRAP The palm latex wraps around the upper side of the thumb to enlarge the grip area.

SIZES	7 - 12
SUGGESTED RETAIL	\$150.00 USD
COLOR	1130 white / gold

KEEP YOUR COOL WITH OUR REUSCH OUTLAST GLOVES!

56 70 194 Attrakt Gold X Outlast™

3530 tropic orange / black

GOLD X GRIP

REUSCH GRIP GOLD X™ latex palm is our most tacky high-end match latex, which includes a special adhesive additive.

OUTLAST THERMO-TECHNOLOGY Originally developed for NASA to protect astronauts from temperature fluctuations in space, Outlast® Thermo-Technology stores and releases heat for optimal thermal comfort. When you get too warm, it absorbs and stores the excess heat to keep you cooler and help prevent perspiration. When you're cold, it releases the stored heat back to you.

EVOLUTION NEGATIVE CUT Negatively stitched version of the Evolution Cut. The latex is seamlessly rolled around the fingertips for a tight fit, the best ball control, and maximized latex-to-ball contact area.

LATEX PUNCH ZONE Light and durable punching zone made of latex material, resulting in a very robust and at the same time highly flexible backhand.

LATEX GUSSETS provide optimum flexibility.

PRESHAPED CONSTRUCTION The anatomical shape of the glove and the slightly spread fingers enhance the glove's wearing comfort and support a natural catching position.

BACKHAND textile base with latex punch zone.

3D THUMB CROTCH™ offers rolled crotch construction eliminating open seams which tear more easily along with an ergonomic fit and maximum comfort.

DOUBLE THUMB WRAP The palm latex wraps around the upper and lower side of the thumb to enlarge the grip area and creates an ergonomic shape.

AIRVENTSYSTEM™ mesh material provides optimum circulation, keeping the goalkeeper's hands cool.

PULL LOOP entry system.

FULL STRAP with textile window and rubber ender.

ELASTIC CUFF with Pull Loop entry system.

SOLID

The Attrakt **SOLID** goalkeeper glove offers reliable Reusch quality and great durability on artificial grass and hard surfaces thanks to its Reusch Solid palm foam with synthetic latex. Good choice for recreational goalkeeping. Latex Free.

EXPANSE CUT Outer seams enlarge the palm surface of this flat cut and therefore increase the latex-to-ball contact area.

ELASTIC CUFF offers a snug and comfortable fit around the wrist, providing flexibility and support.

FULL STRAP closure system offers enhanced support and customizable fit.

BACKHAND BASE Micro Mesh material ensures breathability and flexibility for enhanced comfort and movement.

PUNCHING ZONE Punch Foam padding enhances durability and provides extra cushioning for controlled and effective punching during gameplay.

GUSSETS Micro Mesh material ensures breathability and flexibility for enhanced comfort and movement.

THUMBFLEX™ A cut in the palm latex between thumb and index finger optimizes the flexibility of the thumb and the ergonomic shape of the glove.

34 62 802 Re:invigorate Glove Wash™

Our reformulated **RE:INVIGORATE GLOVE WASH™**. This formula is twice as concentrated as our first Glove Wash, and as such, takes half the amount to clean the foam palms on your gloves. Still made only with natural ingredients. The formula is mild, low foaming, biodegradable, and non-toxic. It contains no phosphates, chlorine bleaches, dyes or perfumes that can damage foams. It has a natural scent that helps eliminate glove odor. **Sold by the dozen only.**

MADE IN THE USA!

SUGGESTED RETAIL	\$12.00 USD (\$144.00 per dozen*)

Accessories

Micro Fiber Goalkeeper's Towel 32 62 401

Stay dry and ready. In addition to containing a beautiful Reusch design, these 15"x15" collectible towels are soft, durable and absorbent. The lint-free terry type microfiber material is made of thousands of split fibers which allow the cloth to absorb liquid aggressively without being abrasive. They are safe to use on multiple surfaces because they are constructed from woven polyester / polyamide blend microfiber. In addition, the edges of the towels are sewn with over lock stitching which greatly increases the life of the towel. When cared for properly the towel can last hundreds of washings.
