RIVAL HELMET

TEAM 2022 PRODUCT

RIVAL HELMET

- Sleek shell and face mask design incorporates crafted lines that accentuate speed, giving players an aggressive, fast look and an improved field of vision.
- The Sure-Fit™ air system features a built-in pump and release valve, allowing players to adjust their fit on the fly. No detachable pump needed, just inflate to the desired fit, right on the field.
- Integrated ventilation throughout the shell allows air to flow through the helmet, keeping players cool even when the game gets hot.
- The comfort liner adds an additional layer of comfort to the interior padding, reducing pinching and discomfort.
- Thousands of different paint combinations available in different finishes, making it the most customizable helmet in the industry.
