Welcome to our catalog for 2024 where you can create lists and make requests directly to our team. Additionally, you can view live inventory, place new orders, and check order history on our B2B website: b2b.select-sport.com.

Please reach out to co@selectsportamerica.com or ecw@selectsportamerica.com to create your own unique login.

EVERYTHING FOR YOUR CLUB

When we say everything for your club – we mean it!

SELECT is proud to offer a full range of soccer and futsal equipment. Whether you need a new soccer ball, futsal ball, athletic wear, or a range of training equipment – SELECT is a total supplier for amateur, professional, and youth athletes.

Several new soccer ball designs and a totally redesigned goalkeeper glove range have been added for 2024 to complement our well-rounded lineup to provide your team with the best option for your level of play.

Sustainable initiatives are a focus point at SELECT Sport. We want to reduce our use of plastic and to use even more recycled materials in our products. This year our Brilliant Super will feature a new construction which utilizes partially recycled materials.

Complete the kit for your team with our new clothing line for matches and training. Choose from stock or fully custom jersey options that best fit your team's needs. SELECT is committed to producing the highest quality clothing and equipment that you have grown to expect from our soccer balls.

Get ready to take the field with SELECT – the player's choice.

HISTORY

SUSTAINABLE EFFORTS

We know that our actions matter

We are continuously taking sustainable steps in our production, packaging and transportation. We want to reduce the use of plastic in our packaging and are focusing on introducing recycled materials in our products. By using recycled materials, the environmental impact of our products is reduced.

New sustainable efforts at the ball factory

An installation of **404 solar panel modules** on the rooftop at our ball supplier Anwar Khawaja Industries factory in Sialkot, Pakistan has been completed. The installation is expected to reduce **CO₂ emissions by 270 tons annually**.

The factory is also ISO 14001 environmental certified and SMETA 4-pillar certified.

We have reduced our **use of plastic** by **50%** in the packaging of the SPAIN clothing line

The Futsal Planet and Planet football, a match and training ball, made from **recycled plastic bottles** and **natural latex**

Our factory is now **only using recycled plastic bags** when producing our footballs

We saved **300.000 plastic packets annually** by switching our Profcare Support packaging from plastic to a smaller cardboard packaging, thereby **reducing our transport**

PISA TEAMWEAR FOR ADULTS AND CHILDREN

NEW

Looking to outfit your team in full
SELECT gear?

Your team will be able to train and play in style with the Pisa teamwear. This range of uniforms is available in unisex and youth sizes in a quick-drying, durable and lightweight material that leaves the skin cool and dry.

GOALKEEPER GLOVES

NEW

SELECT's revamped goalkeeper glove range for 2024 is the result of sourcing and developing materials and technologies that aim to deliver a high level of comfort, grip, durability, and protection that goalkeepers need at every level.

Our top of the line 88 Pro Grip is a lightweight glove in a negative cut with 3mm Quartz latex for a perfect grip in all kinds of weather. An airprene lining provides great comfort, flexibility, and minimal water absorption. The updated 77 Super Grip now features a negative cut palm, removable finger spines and airprene lining for a much higher level of comfort.

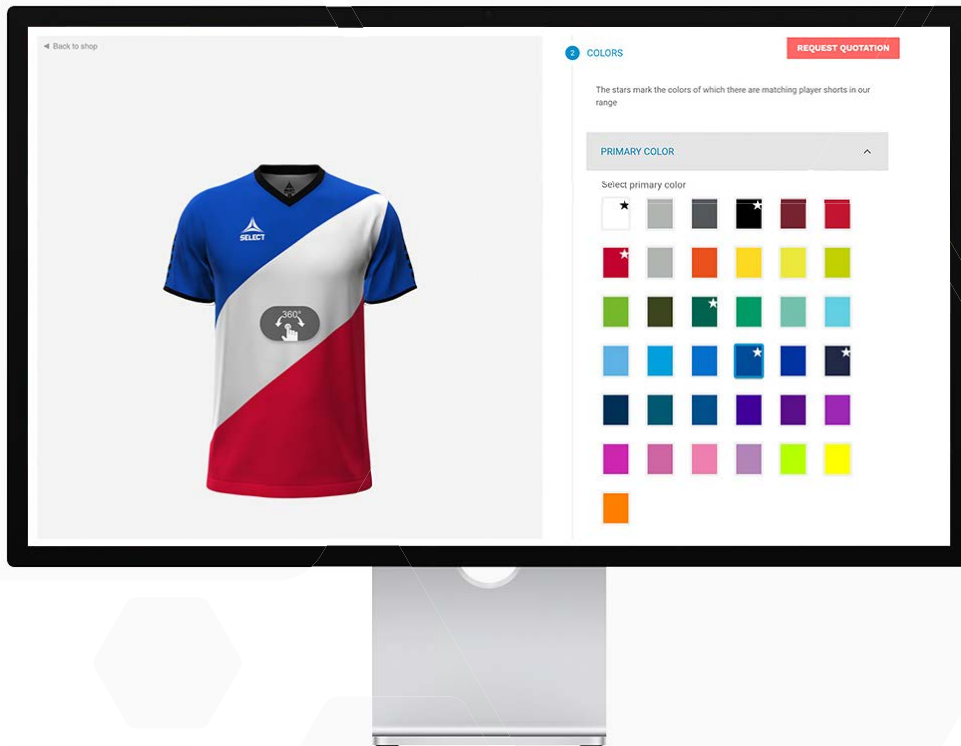

2024 also introduces the 34 Protection and 04 Youth Protection, formerly the 33 Protec and 03 Youth Protec. The name is not the only change as both gloves will now feature a more breathable and more comfortable flat cut palm with non-removable finger spines. With the aid of an Anatomical Fit System all gloves have been designed with a slight bend according to the natural gripping position of the hand. Thus, ensuring comfort, flexibility and movement of the glove aligned with the speed of the fingers.

YOUR CLUB, YOUR SHIRT

Every club gets the possibility to create their own designs and express their identity in custom jerseys and shorts with SELECT. Through our special sublimation printing process, it is possible to generate complex designs with logos, names and numbers directly printed without any additional costs. If you are interested in an individual club shirt, contact the sports dealer of your choice, or send us an email at info@selectsportamerica.com.

THE ORIGINAL 32 PANEL BALL CONSTRUCTION

Every single football, handball and futsal ball from SELECT is based on the revolution from 1962, where our founder, Eigil Nielsen, invented a ball made of 32 panels. The overriding desire was to create the most reliable ball with the most predictable, straight flight and a bounce neither too high nor too low.

It was impossible to make a perfectly round ball with just 18 panels, which was the standard construction of a ball in the past. With the 32 panels – 20 hexagons and 12 pentagons - SELECT succeeded in creating the roundest ball ever seen. Later, a group of American scientists won the Nobel Prize for discovering that the molecules of carbon with a special irradiation organize themselves as a completely round ball – something Eigil Nielsen had already discovered and realized in his football with 32 panels, why the reinvention was named “the football molecule”.

A ball with optimum roundness is essential to obtain reliable aerodynamic – a straight flight and a controlled bounce. Our finest football, BRILLANT SUPER TB, has been thoroughly tested in a wind tunnel at the Institute of Health & Sports Science at the University in Tsukuba, Japan. The results show that BRILLANT SUPER has a better aerodynamic than other top balls in the market. The ball's classic construction with 32 panels means that the ball meets resistance at a later point in its trajectory through the air, thus retaining a steady, high speed over a longer period of time. This provides a stable and more predictable flight – highly valued by all football players.

The majority of our balls are still based on Eigil Nielsen's original invention of the 32 panel ball construction, as we never compromise on quality, playability or durability.

OFFICIAL LEAGUE MATCH BALLS

SELECT is the official match ball supplier to the Swedish Allsvenskan and Superettan, the Danish national team, the Bosnian and Herzegovinian league, the Czech league, the Romanian league, the Danish men's and women's league and first division, the Norwegian men's and women's league and the Finnish league.

Our BRILLANT SUPER ball is also supplied to a vast number of teams and federations around the world. Furthermore, our German subsidiary DERBYSTAR is the official match ball supplier for the Dutch league and the German Bundesliga. The Bundesliga is ranked as one of the world's best football leagues by FIFA.

INSPIRED BY 60 YEARS OF BUNDESLIGA!

This is the **TWO** new **DERBYSTAR** by **SELECT** official Bundesliga match balls for the 2023/24 season

On the occasion of the 60th anniversary of the Bundesliga, the sports goods manufacturer from Germany was inspired by the look of classic footballs from the beginning of the Bundesliga when creating the design and reinterpreted it for the new official match ball. While in the past the 12 pentagons were monotonously black, DERBYSTAR has upgraded them with dynamic design elements and eye-catching colors to create an innovative look for the new official match ball.

First Official Bundesliga match ball partly produced of recycled material

An innovation is hidden in the material of the new ball: For the first time, recycled material is used in the production of an official match ball of the Bundesliga. In total, around 10% of the new Official Bundesliga Match Ball is made from recycled polyester by weight.

- QUALITY INSIDE AND OUT

BRILLANT SUPER TB has the characteristics that distinguish a classic SELECT ball and is suitable for matches at the absolute highest level. The materials are carefully selected and have exactly the qualities that give the best playability and durability.

The optimum roundness is ensured with the well known 32 panels spread over 12 pentagons and 20 hexagons. The outer material of the ball consists of synthetic leather with a light surface structure that minimizes air resistance.

Under the synthetic leather hides the SELECT natural latex Zero-Wing bladder with built-in balance point in the opposite end of the valve hole. On the outside of the bladder is a lining made of a 4 mm. thick and exclusive foam material. The outer material and the underlying foam give the ball a softer, lighter and a more comfortable touch. Despite the fact that the ball feels lighter, the weight is the same as a traditional football.

TB stands for Thermo Bonding, a method that activates the glue with heat and pressure to bond the 32 panels. There are no stitches, and the TB ball takes up less water keeping the original weight better when playing on a wet surface.

The ball has, among other places, been tested at the Institute for Health & Sports Science at Tsukuba University in

Japan. The test results showed that the ball – just like other balls from SELECT – faces less wind resistance in the first part of the flight, moves easier through the air and meets wind resistance later than other balls on the market.

The FIFA Quality Programme for Footballs was introduced in 1996 to harmonise and improve the quality of footballs. Focusing on the ball, the very heart of the game, the prestigious FIFA quality labels are only given to balls that have passed rigorous testing.

FIFA Quality Pro is reserved for only the best standard of match balls available. FIFA Basic is the newest standard focusing on cost efficiency, durability and safeguarding player safety.

Approval	Ball size	Circumference	Normal weight	Light weight
	3	60 - 62 cm	320 - 340 g	280 - 310 g
	4	63.5 - 66 cm	350 - 390 g	290 - 320 g
	5	68 - 70 cm	410 - 450 g	350 - 380 g
FIFA Basic	5	68 - 70 cm	410 - 450 g	
FIFA Quality Pro	5	68.50 - 69.50 cm	420 - 445 g	

HAND STITCHED

- HIDDEN BEHIND THE ELEGANT EXTERIOR

Common to all our balls is that the quality is high and the durability long. An optimally round football consists of 32 panels made up of 12 pentagons and 20 hexagons. The 32 panels are sewn together using 630 double stitches and 60 corner stitches and are closed off – especially for SELECT – with a double knot. The ball lasts longer this way.

Hidden behind the elegant exterior of the balls in our Pro and Club Series is a Zero-Wing bladder made of high-performance natural latex. The concept has been developed to ensure that not only the ball but also the bladder is as round as possible. We solely use latex bladders in our footballs with build-in balance point at the opposite side of the valve hole. This, together with the Zero-Wing concept, ensures a perfectly balanced ball with a very lively bounce.

To stabilise the ball and ensure that it remains round, the 32 panels are lined with several layers of textile material. The lining helps to adjust the softness and improves the contact between the ball and the foot.

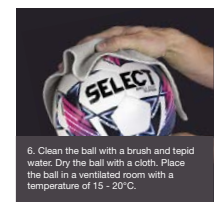

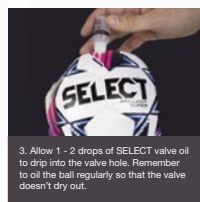

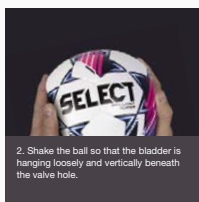

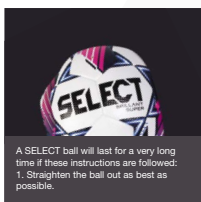

The outer layer of the ball is made of synthetic leather in polyurethane (PU). The surface of this material can be either "shiny", "grain" or "pattern" and consists of lots of PU fibres. Combined, this gives a strong surface with consistent softness.

High quality is essential for SELECT. For this reason, each ball undergoes a stringent test at our production facilities in Pakistan. Here, they are tested for stitching, surface, roundness, circumference, weight, air retention and colour printing. Even the bladders are inflated to ensure perfect balance. Our standards for quality are the highest in the industry and the balls are of course tested and approved according to FIFA standards.

The FIFA Quality Programme for Footballs was introduced in 1996 to harmonise and improve the quality of footballs. Focusing on the ball, the very heart of the game, the prestigious FIFA quality labels are only given to balls that have passed rigorous testing.

FIFA Quality Pro is reserved for only the best standard of match balls available. FIFA Basic is the newest standard focusing on cost efficiency, durability and safeguarding player safety.

DUAL BONDED

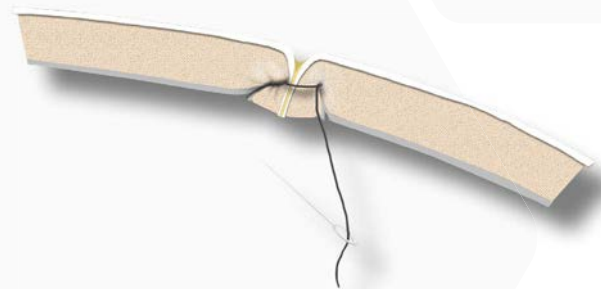

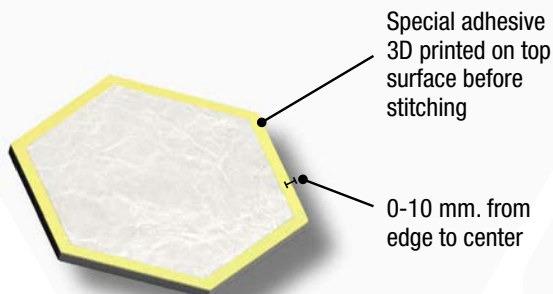

- IMPROVED STABILITY AND A SOFTER TOUCH

The special feature of the dual bonded production method is that the ball's 32 panels are both stitched together and then sealed in the edges.

A DB ball is a construction that consists of a PU-material laminated with foam. Next, two layers of textile underlining are laminated to the foam layer to add stability. The panels are then printed with 3 mm. edge glue and stitched by machine. The glue is activated in the heat mold to hide the stitches and the seam sealing is done by hand. By

using glue in the sealing of the seams, the water uptake is reduced significantly.

The bladder inside is an SR bladder with excellent air retention. The result is a football with both stability, control and a softer touch compared to other footballs.

Approval	Ball size	Circumference	Normal weight	Light weight
	3	60 - 62 cm	320 - 340 g	280 - 310 g
	4	63.5- 66 cm	350 - 390 g	290 - 320 g
	5	68 - 70 cm	410 - 450 g	350 - 380 g
FIFA Basic	5	68 - 70 cm	410 - 450 g	
FIFA Quality Pro	5	68.50 - 69.50 cm	420 - 445 g	

SELECT is proud to be the official ball supplier to the United Soccer League (USL), the largest and fastest-growing professional soccer organization in North America.

The 2024 season will see a bold singular design for the Brilliant Super that will unite over 200 USL Championship, League One, League Two, W League and Academy clubs. USL's Super Y teams and tournaments will showcase the Super as the official match ball.

The inaugural season of the USL Super League will feature an exciting new Brilliant Super design that will be unveiled before the clubs kick off at the highest level of professional women's soccer.

Select is proud to support USL's distinct youth-to-pro pathway in the United States.

NO GRASS? NO PROBLEM

Designed to outperform and outlast the competition on artificial turf surfaces

Why choose SELECT TURF specific footballs?

Across the country, more and more organizations are utilizing synthetic turf surfaces that claim to deliver a “grass-like” experience. There is no denying the benefits that these types of surfaces deliver to youth and adult football players.

However, football players can testify to some of the harsh characteristics of artificial surfaces:

- Synthetic surfaces can cause a standard ball to skip and roll more quickly than it would on a grass surface.
- The rubber filling and synthetic fibers can cause a standard ball to peel and rip from regular use.

What makes SELECT TURF series different?

SELECT's commitment to innovation and quality has led to the development of the FPUG material used on SELECT turf series balls. FPUG is an extremely durable yet soft casing that improves the life of your football while ensuring natural playing characteristics.

All SELECT TURF footballs are 100% handstitched. By hand stitching, SELECT has ensured that these balls will maintain their shape and offer exceptional durability.

PLAYER'S NUMBER

It's both important and expensive for every team to have good training balls. Now SELECT makes this easier - as the first in the USA - by introducing the Player's Number-concept.

On all of SELECT's most popular Club and Training balls, we have implemented a white-on-black digital 88-panel. Each player can then with a black permanent marker 'erase' the white elements of the digital 88, and thereby create his/her own Player's Number. Thereafter it's very easy to recognize his/her own ball, and get it back home after training.

THERMO BONDED

- LOW BOUNCE FOR OPTIMUM CONTROL

The popular SELECT FUTSAL SUPER is now thermo bonded. TB is a method that activates glue with heat and pressure to bond the 32 panels of the ball. There are no stitches, giving the ball a fantastic, soft touch.

Hidden behind the elegant exterior of the futsal ball hides a specially developed butyl bladder with polyester fibers inside. That ensures a very reliable low bounce compared to a normal football making it much easier to control. All our balls have a butyl valve inside covered by foam to avoid the bladder from puncturing when inflating the ball.

To stabilise the ball and ensure it remains round, the 32 panels are lined with several layers of textile material and foam. The lining and foam helps to adjust the softness and improves the contact between the ball and the foot.

The outer layer of the ball is made of synthetic leather in polyurethane (PU). The surface of the FUTSAL SUPER TB is in a new 3D diamond structure ensuring optimal friction between ball and boot.

High quality is essential for SELECT. Each ball undergoes a stringent test at our production facilities in Pakistan. The balls are tested for stitching, surface, roundness, circumference, weight, air retention and colour printing. Even the bladders are inflated to ensure perfect balance. Our standards for quality are the highest in the industry and exceed FIFA's regulations for the best match balls. The balls are of course tested and approved according to FIFA standards.

HISTORY

AN ANATOMICAL WORK OF ART

The top model 88 PRO GRIP consists of 3 mm Quartz Latex guaranteeing a perfect grip in all weather conditions. The latex is wrapped from palm to backhand maximising the catching area, and the negative glove cut provides constant latex contact between the hand and the ball. The soft airprene inside provides optimum comfort, increases the glove's flexibility and ensures minimal water absorption when playing in wet weather.

With the aid of an Anatomical Fit System the gloves have been designed with a slight bend according to the natural gripping position of the hand. Thus ensuring comfort, flexibility and movement of the glove aligned with the speed of the fingers.

A wide wrist strap allows a feeling of stability and safety in the wrist. The wrist is asymmetric and has an elastic insert to ensure easy entry into the glove.

Types of cuts

Negative Cut

A popular glove cut choice that reminds of Flat Cut. This style of cut also has gussets between the palm and the backhand. The gussets of the 88 glove are also made of latex giving constant latex contact between the glove and the ball. Negative Cut fits snugger and the fingers are held in place giving optimal ball contact when catching. This is the most common cut among professionals.

Flat Cut

Traditional glove cut with a flat palm construction providing a larger area of contact and making the glove more flexible. This style of glove typically fits looser than many other styles with more room for the fingers. Flat Cut is the most popular cut used for finger protection gloves.

Latex technology

Flexion Latex

Durable latex developed for youth gloves. Suitable for all weather conditions

New Basic Latex

Durable latex with a fantastic grip in all kinds of weather that makes it suitable for both training and matches

New Softy Latex

Soft and durable latex - suitable for all weather conditions. Highly recommended to pre-wet for best grip possible

Dura Grip Latex

Soft and strong latex for all weather conditions. The latex is longlived and suitable for both training and matches

Dura Pro Latex

Strong and durable latex especially suitable for use on artificial grass

Professional Grip Latex

High quality latex for professional matches. The glove has a perfect grip in all kinds of weather.

Super Soft Latex

Very soft and durable latex, used for professional match gloves. Provides a good grip and optimum contact with the ball. Well-suited for all weather conditions.

Ultra Pro Latex

Soft and hardwearing latex, especially developed for our best youth gloves, that combines durability with a fantastic grip. For all weather conditions.

Quatz Latex

Top performance latex. Ideal for professional gloves. Provides a good grip in both dry and wet weather compared to other kinds of latex.

Adhesion Plus Latex

Top performance latex with a good grip in all kinds of weather and great contact with the ball.

Glove technology

Anatomic Fit System

Ensures correct fit, as the glove is designed according to hands' natural grip position

Punch Zone

In non-sliding material for increased force and reduction of the rotary effect on the ball

Wide wrist

Extra wide wrist strap for improved support and comfort

Comfort

Mesh on the inside of fingers to ensure good air circulation

Flexibility

Injection mold spiderweb design for a light-weight feeling and increased flexibility

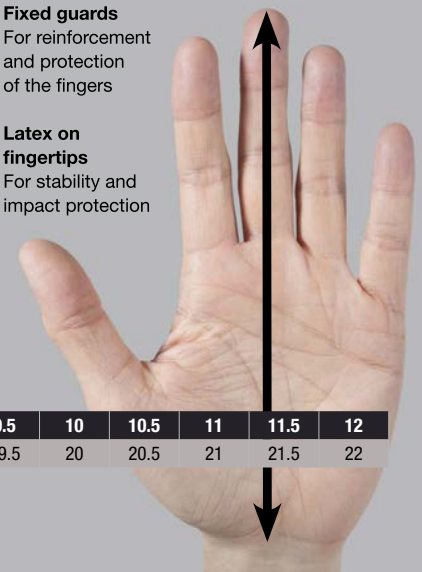

Protection

Fixed guards

For reinforcement and protection of the fingers

Latex on fingertips

For stability and impact protection

Glove size

Measure the length of the hand as shown and find suggested sizes in the chart below.

PREVENT HEAL RECOVER

Bring your own massage
therapist everywhere

*Kristoffer Glavind Kjær,
Body Therapist treating
top athletes in cycling
and handball and
owner of
ManuVision.*

BALL-PUNKTUR & BALL-STIK

Ball-Stik and Ball-Punktur was developed more than 45 years ago by relaxation therapist Grete Wolfgang. Since then, the massage balls have become iconic and are used in gyms, schools and private homes.

The massage balls soften muscles, stimulate the blood circulation and create lymphatic circulation to reduce swelling.

They are produced in Denmark, and have been since 1972, with phthalate-free plastic.

Ball-Punktur is small and handy and can be brought everywhere.

Treating the Tour de France riders, Kristoffer Glavind Kjær has introduced the Ball-Punktur to help riders like three-time World Champion Peter Sagan recover from a day's race by reducing muscle tension, effectively strengthening muscles and increasing blood flow to help them perform at the highest level.

The massage ball also follows the Danish national handball team, as it was a part of the 2019 IHF Men's World Championship when they took first place, and Ball-Punktur was also a part of the Men's EHF Euro 2020.

LEGENDARY SINCE 1947

SELECT Sport was founded in 1947 by Eigil Nielsen, goalkeeper for the Danish national football team, who devoted his life to create the perfect ball. The name of the company was given because of the exclusive leather that was specially selected for the ball production.

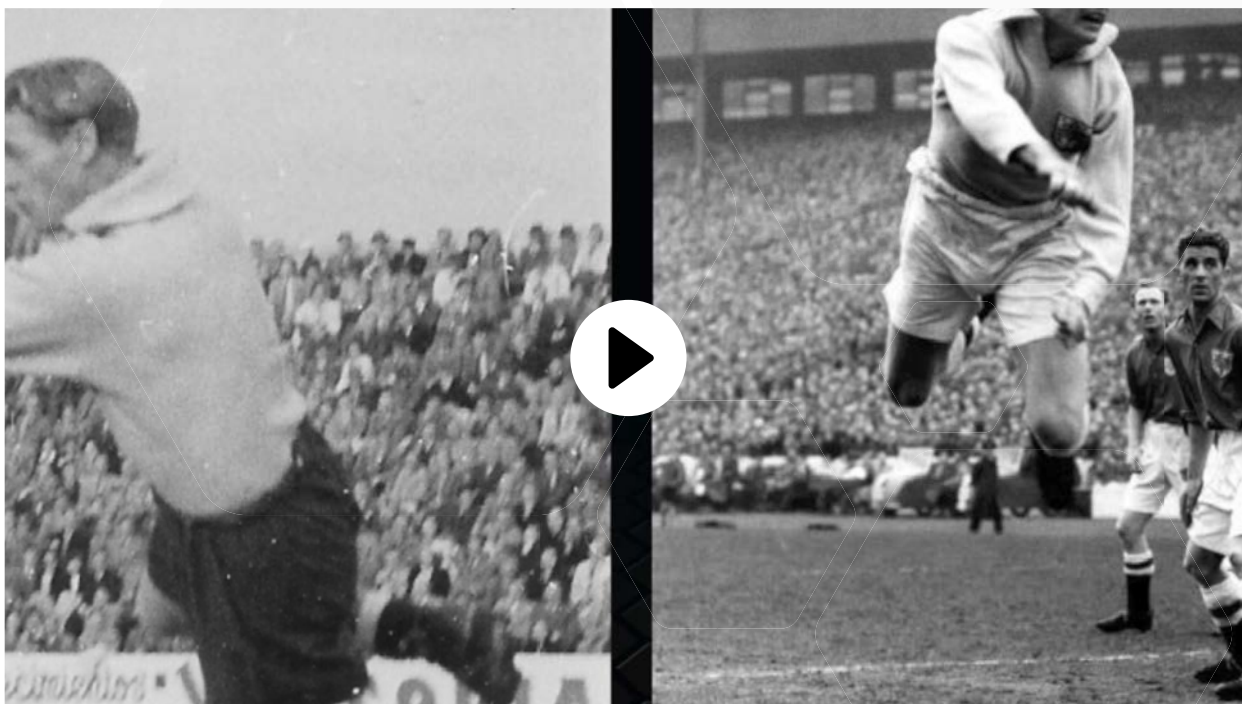

By producing many of the ball industry's groundbreaking creations such as the first laceless football, the first ball with 32 panels and balls made of synthetic leather, SELECT naturally became a trendsetter.

Back in 1951, SELECT signed a contract to supply balls for the Danish national football team, and in 1957 SELECT was appointed official supplier by the Danish Handball Federation. These partnerships have continued ever since and are some of the longest in the history

of sport. A large number of agreements with both remarkable football and handball federations, clubs and players have since been made.

Today, SELECT is known as the ball specialist. Our footballs, futsal balls and handballs can be found in more than 50 countries, and we are the world's largest supplier of handballs. More than three million different SELECT balls are produced each year through a close cooperation with Anwar Khawaja Industries in Pakistan.

We have been developing balls for 75 years, and the passion for innovative craftsmanship still lives on in our daily work. Football, futsal and handball matches around the world are played with balls built on Eigil Nielsen's original principle of 32 panels, just as most balls produced worldwide are based on SELECT's inventions.
