PRODUCT

SMARTFLEX

SmartFlex® foam offers lightweight, flexible, breathable, washable, impact protection that hardens on impact, then returns to a soft and flexible state.

THERMOFORMED PADS

Thermoformed pads offer advantages like ease of use, pre-formed shapes, and ability to be tailored to specific components, ensuring optimal contact and heat dissipation.

BREATHABLE MESH

Breathable mesh fabrics offer many advantages, such as: Enhanced airflow and cooling properties, moisture management, lightweight, flexible, wicking and easy to clean.

MEMORY FOAM

Memory foam absorbs impact through its unique viscoelastic properties: it's both viscous elastic (able to stretch and return to shape), allowing it to slowly deform under pressure and then gradually return to its original form, effectively absorbing and dissipating energy.

GLOSSARY OF TERMS

COMMOTIO CORDIS is a phenomenon where sudden cardiac arrest is triggered by a direct blow to the chest at a critical moment in the heartbeat.

ONE KNEE DOWN is a modern and recommended catcher's stance where one knee is bent and one leg extended out to the side alternating throughout the game for less fatigue on one leg only.

VIZTECH is a term stolen from CGI and photorealistic rendering programs where you are able to see the technology powering the finished good, almost as if x-ray.

THERMOFORMED refers to a plastic manufacturing process where thermoplastics, in this case, memory foam, are heated and molded into a specific shape.

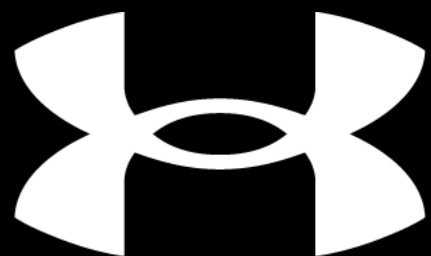

COMPRESSION MOLDED is a versatile manufacturing process where preheated material, in this case, foam, is placed into an open, heated mold cavity, closed, and compressed to take shape.

ARMOURLOCK BUCKLE is a term Under Armour uses to refer to the catcher's buckle to emphasize the locking mechanism.

HEARTBEAT is the name of Under Armour's classic logo with the U and A intersecting, while the center oval is referred to as the "island".

COMPRESSIVE FABRICS are high-elasticity, engineered textiles—typically blends of spandex (elastane) with nylon or polyester—designed to apply consistent pressure to the body to enhance circulation, stabilize muscles, reduce swelling, and improve athletic performance or post-surgical.

SPOMA is the acronym Under Armour uses to refer to Sports Marketing.

MULTI-DENSITY SMARTFLEX HELMET SYSTEM

A layered system of SmartFlex and multi-density foams system delivers NOCSAE-certified head protection while maintaining comfort across extended play. Strategic material zoning—spacer mesh in thermal hotspots, low-abrasion knit at skin contact, and structured foam in load-bearing zones—optimizes airflow, stability, and certified head protection.

FEATURES & BENEFITS

CATCHER'S GEAR

COMMOTIO CORDIS SMARTFLEX PAD

Commotio cordis is a sudden cardiac arrest triggered by a direct blow to the chest at a critical moment in the heartbeat. Our integrated SmartFlex pad is purpose-built to help reduce that risk. The first fully NOCSAE ND200—certified solution of its kind, it delivers proven cardiac-impact attenuation while staying flexible, breathable, and body-mapped for a true athletic fit. Visible through UA's diamond VizTech perforations, it represents a new era of advanced protection—redefining a category long dominated by rigid shells.

PROTECTIVE GEAR

HEADER

UNDER ARMOUR

THERMOFORM SHIELD

Inspired by G-Form's moto and mountain bike heritage, a fully thermoformed memory-foam layer frames the SmartFlex commotio cordis pad. Engineered geometry and perforation zones balance structure, airflow, and control under game-speed conditions. Beyond the stealth, moto aesthetics, this foam layer creates a ball-deadening effect on impact—dropping pitches at the catcher's feet instead of ricocheting away. Faster recovery. More outs. Elevated control. Protection that performs.

ARMOURLOCK PRECISION BUCKLE

Designed for speed and certainty, the ArmourLock buckle features guided alignment geometry and a tactile matte grip surface for intuitive engagement. The angled entry path and audible lock confirmation ensure secure closure without visual confirmation—minimizing distraction and transition time between innings. From youth athletes to pros transitioning between innings, it delivers fast, confident lock-in every time.

SMARTFLEX LIMB PROTECTION

At the interior core, injection-molded SmartFlex encapsulated in fabric delivers precision impact management without bulk. Soft and flexible in motion, it instantly stiffens on impact to disperse energy from pro-level velocities. Diamond VizTech perforations maximize breathability while exposing the technology inside. Molded groove geometry enhances body mapping for a locked-in, ergonomic fit under dynamic play.

FEATURES & BENEFITS

LACROSSE

CREATES A COOLING EFFECT

ISO-CHILL CONSTRUCTION USES FLAT YARN TO DISPERSE BODY HEAT AND TITANIUM DIOXIDE TO ABSORB UV ENERGY. THIS FABRIC DOESN'T JUST KEEP YOU COOLER, BUT ACTUALLY FEELS COOL TO THE TOUCH

ICON ELITE ARM GUARD

MSRP

\$80.00

WHOLESALE

\$40.00

SIZES

XS S M L XL

- **SmartFlex pads** offer form-fitting and lightweight protection that vents as they bend to reduce unnecessary heat buildup
- **Iso-Chill Construction** helps dissipate heat from the body, creating a cooling effect. Iso-Chill actually feels cool to the touch.
 - 4-way stretch material moves better in every direction
 - Material wicks sweat & dries really fast
 - UPF 50+ protects your skin from the sun's harmful rays
- **Breathability compression sleeve** provides a secure fit with zero bulk
- **Silicone gripper** at the top of the sleeves keeps the pads from slipping during play
- Machine washable
