GLUKOS

WAIST

Stand with stomach relaxed. Measure the minimum circumference in the waist area. Tape should be parallel with the floor.

WRIST

Keeping wrist straight, measure directly over joint, including wrist bones.

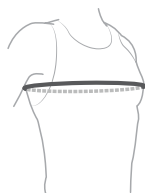

THIGH

Stand and measure the maximum circumference of your upper leg near the crotch.

FOREARM

With your arm slightly flexed, measure the fullest part of your forearm, typically midway between your wrist and elbow.

CHEST

Stand and measure around the fullest part of your chest. Tape should be parallel with the floor.

BICEP

With your arm slightly flexed, measure the fullest part of upper arm/bicep. When ordering a pair, take measurements of both arms and use the average of the results.

KNEE

Measure the knee to be protected. Stand and bend your leg just less than 45 degrees, measure around the largest part of knee, directly over the patella (kneecap).

FOOT

Measure circumference at center of arch directly over top of instep.

KNEE

Stand and bend your leg just less than 45 degrees, measure knee circumference 2" (5cm) below the center or patella (kneecap).

CALF

Stand and measure the calf in question. Measure at the fullest part of the calf. When ordering a pair, take measurements of both calves and use the average of the results.

ELBOW

Bend your elbow to approximately 45 degrees and measure directly over the joint. When ordering a pair, take measurements of both elbows and use the average of the results.

ANKLE

Stand and measure ankle circumference 1"/25cm above center of inner ankle bone tip. If you measure while seated, flex your foot slightly back toward yourself as you measure.
