This carbon weave is a flat, spread-tow material that optimizes strength by reducing fiber crimp and deformation in the composite layering. The custom weave is thin and light, yet extremely strong and resistant to damage.

RL 199

RL 199

Really Lightweight design surpasses even our lightest and strongest stick construction to date. We've taken our highest grade construction and added even higher strength fibers which are a whopping 40% higher in modulus and tensile to achieve astonishing lightweight feel and response. PL188 raises the bar on lightweight durability by combining the latest in modern composites technology and our proven manufacturing techniques.

FUEL CORE ULTRA

FUEL CORE ULTRA

The polymer blade core reinforced with our proprietary rib design is tough and durable and is wrapped with high-grade carbon fiber and our Minimus Carbon 25 outer weave which creates the most responsive blade in our lineup.

NOVIUM 2 PRO

BEVEL TAPER | The unique Bevel Taper is designed to be stiffer through the taper which provides unrivaled control, and accuracy. The stiff taper zone allows the stick to load higher in the shaft which creates more leverage and increased velocity on shots.

MINIMUS CARBON 25 | This carbon weave is a flat, spread-tow material that optimizes strength by reducing fiber crimp and deformation in the composite layering. The custom weave is thin and light, yet extremely strong and resistant to damage.

R.L.199 | A completely re-engineered construction that provides improved durability and weight reduction by using lower weight fibers and thermoplastic-toughened epoxy resin that creates the consistent level of balance, weight, and durability that the most elite players in the world expect from a stick.

D.G. SHAFT SHAPE | Flat side walls with rounded corners provides consistent feel and control for stickhandling, shooting, and passing.

FUEL CORE ULTRA | The polymer blade core reinforced with our proprietary rib design is tough and durable and is wrapped with high-grade carbon fiber and our Minimus Carbon 25 outer weave which creates the most responsive blade in our lineup.

Mid-Kick Flex Profile | Easy loading and maximized shooting power.

Asymmetrical Shaft Geometry | Enhanced bottom hand control, leverage and accuracy with increased durability strength against heavy puck impacts.

Minimus Carbon 25 | This carbon weave is flat, spread-tow material that optimizes strength by reducing fiber crimp and deformation in the composite layering. The weave is thin and super light, yet extremely strong and resistant to damage.

VIBEX | Vibration reduction technology that dampens the feel from puck impacts.

Hi-Fused Construction | Super light balanced feel for efficient blockerhand movements.

TwinSpar | Paddle and blade reinforcements for increased stability on passes and saves.
