PRO STOCK® GLOVES

Pro Stock patterns used by the pros. The best ball glove materials out there, dlove craftsmen devoted to hand crafting the best gloves in the game. It's no surprise that big leaguers choose Wilson® to get them through a 162-game season. The same patterns, materials and craftsmanship go into every Wilson Pro Stock glove whether it's made for play on the game's biggest stage or your local diamonds. For the pros. By the pros.

04 WILSON BASEBALL GLOVES

SuperSuber in a controlly stands and effect disclosion material, perfected to delaw ultimate durability. If the lightest elegation position is now the resident of the position is now place from patter to be supplied down by the weight of rain or over grass. For yours, other manufacturers have tried to remain that own version of Supplication and glatific raylors, modeled materials and more — only to come up their time after times.

STIGEAXI ASO

If you love what you do, you'll never work a day in your life. Few individuals in the world embody that expression as much as Aso, who has dedicated his life to the game he loves.

THAT'S MY GOAL. I DON'T WANT A PLAYER TO THINK ABOUT THEIR GLOVE AT ALL. HIS SMILE IS MY SMILE. IF HE SMILES, I CAN SMILE.

- Shigeaki Aso

Wilson Baseball master Craftsman Shigeaki Aso has revolutionized the game for generations of players. His initial impact on the highest level of the game came in 1986 when he visited pro camps for the first time. With his decades of industry experience working with hides and leather quality control, he immediately noticed how common infield patterns featured long pinky and thumb stalls that were cumbersome to players.

He gathered feedback from as many players as he could find. One year later, he returned with what is, to this day, the most popular Wilson pattern — the A2000° 1786. From there, Aso developed the A2000° 1787 and A2000° 1788, launching a legendary journey of creating ball gloves.

Aso's initial iconic glove patterns were just the first innovations to come from his relationships with players. Aso has put in countless hours with some of the best to ever set foot on the field. Those collaborative efforts continue to this day with elite talents like Mookie Betts. Tim Anderson and Clayton Kershaw.

Aso credits the still-present language barrier between himself and big leaguers for his detailed understanding of what players are looking for in their gloves.

"I'm not a very good English speaker, which is why I ask questions again and again to players." Aso said. "They explain very honestly what they want. If I spoke English better, would they explain things so well to me? But they make sure to explain everything well because that means they'll get a great glove."

These conversations lead to the constant evolution of Wilson ball gloves, from the groundbreaking development of SuperSkin" to more recent designs like Flat Enger Binding and Fastpitch-specific patterns and features. All these innovations share one common goal — ensuring that a player never has to think about their glove. It serves as an extension of the athlete, not an accessory.

O6 WILSON BASEBALL GLOVES

PURSUING PERFECTION

Wilson* Game Model gloves aren't just worn by professionals. They're designed by them. Wilson Ball Glove Master Craftsman Shigeaki Aso sits down with select Advisory Staff members — either in person or on a video call — to craft a Game Model glove designed specifically for their play.

the webbing and even the materials used, culminating in an innovative line of Wilson Game Model gloves. feedback and ensure each glove is built to work for the player's game. Every glove has unique features, from the laces to Aso-san's relentless passion drives his pursuit of the perfect glove. He collaborates with players to receive detailed

 Love The Moment

FOR THE PROS, BY THE PROS

Wilson Game Model gloves aren't just worn by professionals. They're designed by them. Wilson Ball Glove Master Craftsman Shigeaki Aso sits down with select Advisory Staff members — either in person or on a video call — to craft a Game Model glove designed specifically for their play.

Aso-san's relentless passion drives his pursuit of the perfect glove. He collaborates with players to receive detailed feedback and ensure each glove is built to work for the player's game. Every glove has unique features, from the laces to the webbing and even the materials used, culminating in an innovative line of Wilson Game Model gloves.

 Hooking & Slicing Line Drives
 Catcher's Pop Ups

- Heavy Duty Wheels
 3 Base Options
 Easy Conversion between Baseball 8 Softball
 (No Additional Parts Needed)

CLASS: OFFENSIVE & DEFENSIVE PITCHING MACHINE

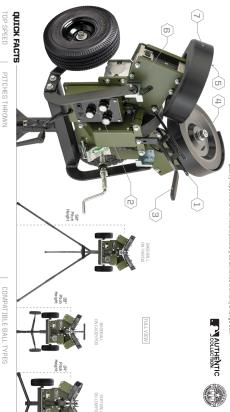

The all-new M3X training machine is the first all-in one crossover pitching machine of its kind. Designed as a smaller, more portable version of the M3 machine, the M3X containes all the same functionality as the M3, while combining the same features of the defensee R-Sen issmachines by AFE."

The all-in-one M3X crossover machine is also able to be converted to a fastpitch softball machine, buy moving the motor placements to the outside settings, the M3X machine can be switched from throwing basebalis to softball

Offensive Pitching: Based off the ATEC* M3 machine, by utilizing three wheels, top speed, accuracy, and spin are maximized due to the balls increased surface contact with the wheels. The M3X is equipped to throw 90 mph giving maximized due to the balls increased surface contact with the wheels. The M3X is equipped to throw 90 mph giving maximized due to the balls increased surface contact with the wheels. the speed control knobs, pitches can easily be dialed-in without making any ph helping you improve the efficiency and effectiveness of your batting practice. physical adjustments to the machine,

Defensive Training. Combining the functionality of the R-Series machines also give the M3X the ability to sw. 350 degrees, and controlleved on from ground balls and fly balls in a single second. This gives the user the abit to execute hundreds of ground balls, in a five, sifty balls and pop-use in a single practice, giving your players in quality repetitions than could possibly be exhieved with only a fungo bat.

PRODUCT FEATURES

PRODUCT SPECS.

- 1. Extremely Durable Cast Polyurethane Perfect for any age/ability
- · Able to withstand mis-hits as well as high repetition, high velocity swings
- 2. Built in Steel Plate in Tee Base Reduces Tee movement Eliminates picking the tee up off the ground after mis-hits

3. Optional Brush Tee & Adapter

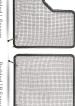

- Reduced resistance results in accurate ball flight for training
- Adapter to fit most tube-style tees included
