METAL & COMPOSITE BAT TECHNOLOGY

OUTER-LOCKING SYSTEM CONNECTION

Extra stiff, one-of-a-kind connection dismisses vibrations on contact for a strong, smooth swing.

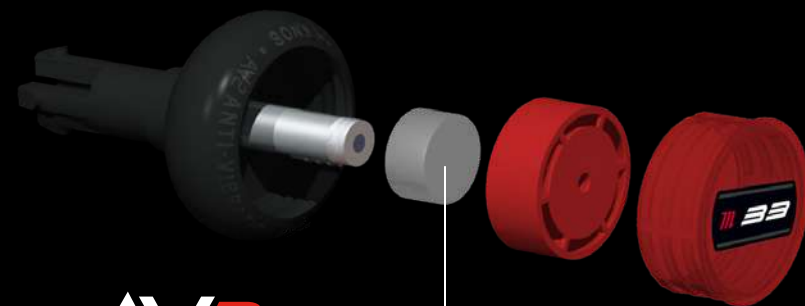

ADVANCED ALLOYS

Thermally treated and strengthened alloy provides increased performance for a more responsive, forgiving feel.

ANTI-VIBRATION KNOB

Second generation AV2 Anti-Vibration knob features an upgraded, finely tuned harmonic dampening system for better feel and less negative vibrational feedback.

MDX COMPOSITE CONSTRUCTION

Multi-directionally patterned layers produce an ultra-responsive barrel with explosive sound.

LONGITUDINAL GROOVE SYSTEM

Increased performance zone from a system of grooves across the thickest section of the barrel wall.

RING-FREE TECHNOLOGY

In order to meet performance standards, other bat companies craft internal governors, or rings, into the thin-wall barrel, which prohibits those spaces from bending, thus decreasing the massive trampoline effect and resulting in a "dead" feeling on contact.

Through expert design and stronger materials, all Marucci bats are designed with ring-free barrels that allow maximum performance with no dead spots.

MULTI-VARIABLE WALLS

Multi-variable wall design creates an expanded sweet spot and thinner barrel walls that are more forgiving after off-centered contact.

CAT9 CONNECT

AZR ALLOY

A complex combination of thermal treatment processes strengthens the alloy for a more responsive, forgiving feel.

MVWD MULTI-VARIABLE WALL DESIGN

Multi-variable wall design creates an expanded sweet spot and thinner barrel walls that are more forgiving after off-centered contact.

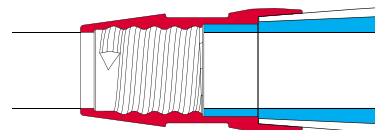

LGS LONGITUDINAL GROOVE SYSTEM

Increased performance zone from a system of grooves across the thickest section of the barrel wall.
(BBCOR ONLY)

OLS OUTER-LOCKING SYSTEM

One-of-a-kind design creates the stiffest connection available, while dismissing virtually all vibrations on contact for the strongest, smoothest swing yet.

- Utilizing a three-stage thermal treatment process, our new AZR alloy offers a more responsive microstructure for better feel, more forgiveness and more performance while maintaining the same strength as its predecessor.
- One-of-a-kind, OLS, Outer-Locking System attaches the barrel to the handle from the outside in, creating the stiffest connection available, while dismissing virtually all vibrations on contact for the strongest, smoothest swing yet.
- Using a Longitudinal Groove System, LGS, across the thickest section of the barrel wall allows for excess weight reduction while also increasing flexibility for an increased performance zone (BBCOR ONLY).
- Multi-variable wall design creates an expanded sweet spot and thinner barrel walls that are more forgiving after off-centered contact.

- Ring-free barrel construction allows for more barrel flex and increases performance with no "dead" spots.
- Power-loaded barrel results in a higher M.O.I. and end-loaded feel for effortless power.
- Two-piece hybrid design combines a carbon composite handle with the AZR alloy barrel designed for power.
- Professionally inspired handle features a removable taper and an ergonomic knob shape for more top-hand control and comfort (BBCOR/-5 only).
- Micro-perforated soft-touch grip with extra tack improves feel and control.

CAT9 COMPOSITE

Using advanced aerospace-grade carbon fiber composites and proprietary resin formula, the MDX barrel has a multi-directional pattern that produces an ultra-responsive barrel.

One-of-a-kind design creates the stiffest connection available, while dismissing virtually all vibrations on contact for the strongest, smoothest swing yet.

- MDX, multi-directional composite barrel is built with multi-directionally patterned layers designed to create an ultra-responsive barrel
- One-of-a-kind, OLS, Outer-Locking System, attaches the barrel to the handle from the outside in, creating the stiffest connection available, while dismissing virtually all vibrations on contact for the strongest, smoothest swing yet
- Maximum barrel length offers a longer surface area with a wider sweet spot for increased performance
- Two-piece composite construction allows for higher performance with all-season durability
- Ring-free barrel construction allows for more barrel flex and increases performance with no “dead” spots
- Mid-balanced barrel results in a medium M.O.I. between an end-loaded and a balanced feel easily used by all players for maximum performance
- Sting-free comfort knob is nylon molded with an ergonomic design to improve comfort and increase control
- Micro-perforated soft-touch grip with extra tack improves feel and control

NEW PROFESSIONAL CUT

MBMPCUSA	\$99.99	SIZES 31-34"
----------	---------	--------------

Orders from professional players are handcrafted to their exact specifications, or preferred cut. During production, if any bat in their order doesn't match their desired specs, that bat is pulled and sold as a "Professional Cut."

Pro Cuts are not "blem" bats; they simply did not match what the player requested. Customers can choose their length and color, but Pro Cuts cannot be selected by model.

NEW GAMER | MAPLE

MVEGMR-BK	\$69.99	SIZES 31-34"
-----------	---------	--------------

- Handcrafted from top-quality maple
- Great transition bat from aluminum to wood
- Classic finish

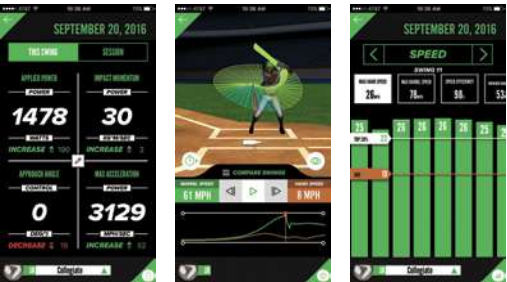

SMART BAT

The Marucci Smart Bat captures your most precise swing data using 11 different metrics in four core swing categories: speed, power, quickness and control. With no external attachments, the SwingTracker sensor by Diamond Kinetics fits securely within the knob of the bat, allowing the most clean, consistent, accurate swing with no added weight or bulky restrictions.

SWINGTRACKER APP

The SwingTracker sensor captures motion data in real time and sends it to a paired mobile device via Bluetooth. View metrics in easy-to-read graphics and charts or sync with a unique 3D image or video of your swing. Free iOS app available through iTunes.

C•MOD

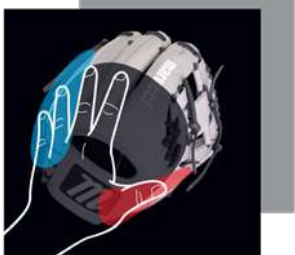

HAND POSITION: STRAIGHT

- The straight hand position is a traditional five-finger stall grip.
- The straight hand position allows greater wrist mobility and glove control and creates a natural feel.

HAND POSITION: SHIFT

- The shifted hand position is placing both the ring finger and the pinky finger inside the pinky stall.
- The shifted hand position creates greater leverage and enhances the player's ability to close the glove while deepening the pocket.

C•MOD FEATURES

- 3D molded thumb and pinky inserts provide ergonomic fit and enhanced pocket closing grip
- Strategically constructed multi-layered sheepskin palm drastically reduces weight while preserving glove structure
- Memory foam padded thumb and pinky molds create an exceptional feel while reducing impact vibration

GLOVE FEATURES

- Premium Japanese-tanned USA Kip leather combines ideal stiffness with lightweight feel (C•MOD Capitol only)
- Professional-grade USA rawhide laces
- Moisture-wicking mesh wrist lining with added memory foam padding

SIZING

- To determine sizing, consider your batting glove size
 - S/M batting gloves – consider the Medium C•MOD glove
 - L/XL batting gloves – consider the Large C•MOD glove
- Medium size uses a tapered wrist opening measuring 7", with the ability to adjust to 6.5"
- Medium size best fits a hand size measuring 6.5" – 7.25" in length
- Large size uses a wrist opening measuring 7.5", with the ability to adjust to 7"
- Large size best fits a hand size measuring 7.5" – 8.25" in length

ON-FIELD TECHNOLOGY

WHY ARE NON-POLARIZED LENSES BETTER FOR BASEBALL AND SOFTBALL?

Polarized lenses distort depth perception and flatten out a player's field of view, reducing clarity and making it more difficult to track the spin, flight and movement of the ball.

DO I WANT GREEN OR VIOLET BASE LENSES?

Green base lenses allow true color recognition while tracking the ball against green grass and blue sky.

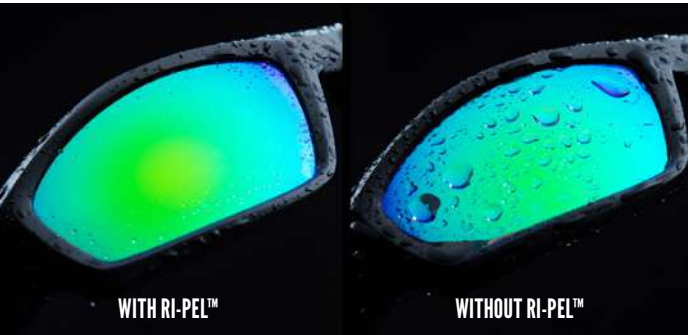

Violet base lenses deliver maximum color contrast for the brightest field of vision to track the ball in all lighting conditions.

IMPACTO LENS TECHNOLOGY MIRRORED LENS

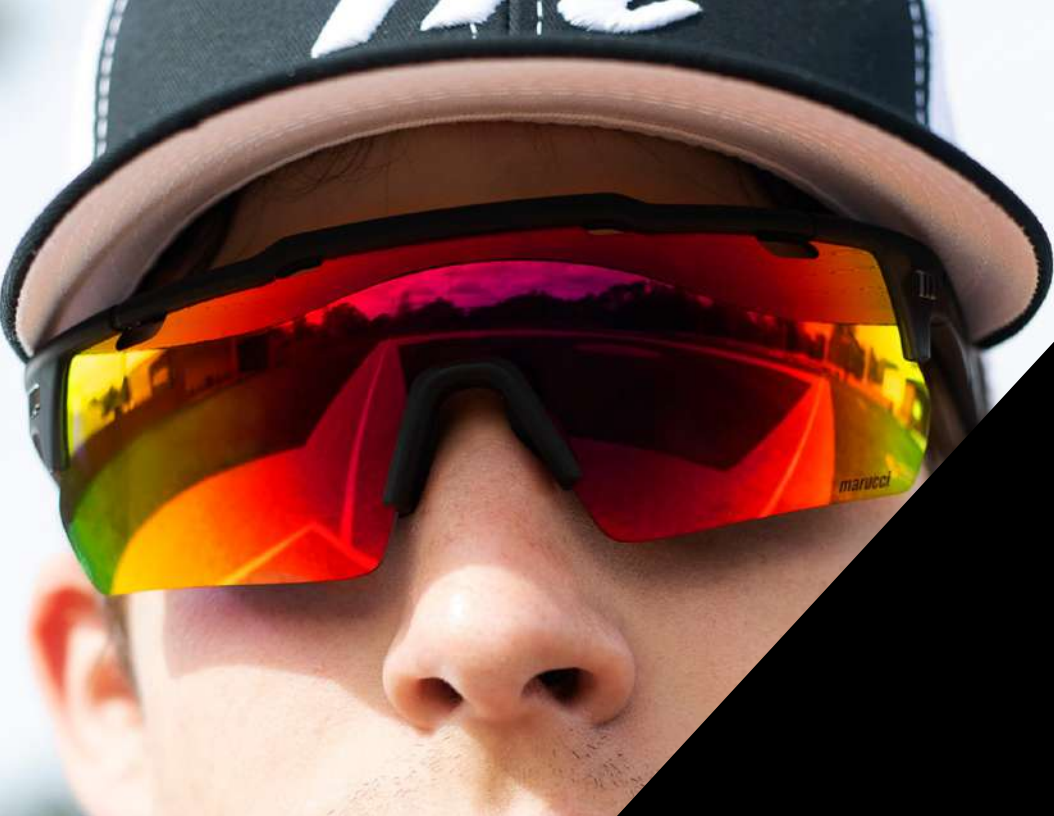

Lenses tested by Zeiss to provide the highest level of protection against ball impact or collision.

RI-PEL™

COATING TECHNOLOGY

Ri-Pel™ is an easy-to-clean transparent, permanent, hydrophobic and oleophobic coating engineered to provide protection from dirt, sweat and the elements, making lenses ideal for sport and everyday use.

LIFESTYLE TECHNOLOGY

WHY DOES THE LIFESTYLE COLLECTION HAVE POLARIZED LENSES?

Polarized lenses provide superior glare protection, especially on the water, which offers greater eye comfort.

WHAT'S THE DIFFERENCE BETWEEN BASE LENS COLORS?

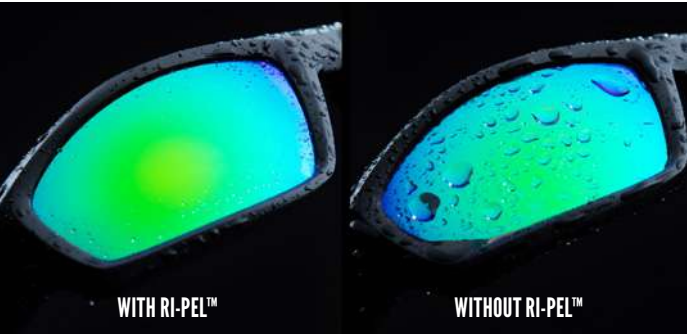

Gray is a neutral tint that allows the eyes to perceive colors in their truest form. Gray tints are better in high lighting conditions as they reduce brightness and glare.

Brown tints reduce glare and blue light, allowing high-contrast visibility and perception of details in bright light conditions.

Rose tints reduce glare and a portion of blue light. They have the ability to brighten vision and contrast in low-lighting like cloudy days.

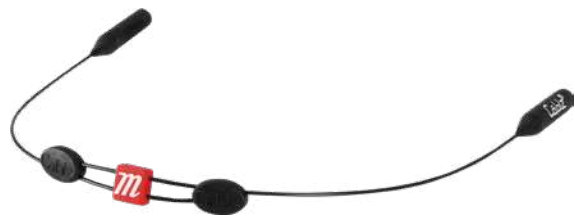

RI-PEL™

COATING TECHNOLOGY

Ri-Pel™ is an easy-to-clean transparent, permanent, hydrophobic and oleophobic coating engineered to provide protection from dirt, sweat and the elements, making lenses ideal for sport and everyday use.
