# WELCOME TO 2020

We are dedicated to creating innovative products that meet the highest quality standards. As one of the world's leading manufacturers of hand-sewn and dual-bonded balls, we have continued to innovate and expand our line of products since our founding father, Eigil Nielsen, created the first SELECT ball in 1947.

We are now official match ball supplier in 12 of Europe's top football leagues, including several leagues in the United States, stating our position as the number one league partner. We are proud to now include Liga Portugal and to be represented in their 1st and 2nd league as well as the Allianz CUP.

Another major addition to our league partnerships is the Bundesliga. 2020 will be our third year for our German subsidiary DERBYSTAR as official match ball in the Bundesliga and 2nd Bundesliga – ranked as one of the best soccer leagues in the world by FIFA.

We know that our actions matter. We are continuously taking sustainable steps in our production, packaging and business partner efforts. To name a few, we have reduced our use of plastic in our Profcare Supports and garment packaging, and we are introducing recycled polyester in parts of our sports clothing as well as water-based ink for our soccer balls.

Furthermore, we are continuing our long-standing Health & Education Program at our production facilities in Pakistan that focuses on medical assistance for the workers and their family including schooling incentives for the children.

We have now expanded our equipment range substantially to provide the training tools needed for players and leagues at all levels. SELECT's training equipment range has been thoughtfully developed with input from professional players, coaches and youth players alike. The same commitment to the highest quality standards for soccer balls is applied to the 2020 equipment range.

We are player's choice and our ongoing mission is to develop high quality products for all players.

Welcome to our catalog for 2020.

# THE ORIGINAL 32 PANEL BALL CONSTRUCTION

Every single soccer, handball and futsal ball from SELECT is based on the revolution from 1962, where our founder, Eigil Nielsen, invented a ball made of 32 panels. The overriding desire was to create the most reliable ball with the most predictable, straight flight and a bounce neither too high nor too low.

It was impossible to make a perfectly round ball with just 18 panels, which was the standard construction of a ball in the past. With the 32 panels - 20 hexagons and 12 pentagons - SELECT succeeded in creating the roundest ball ever seen. Later, a group of American scientists won the Nobel Prize for discovering that the molecules of carbon with a special irradiation organize themselves as a complete round ball - something Eigil Nielsen had already discovered and realized in his soccer ball with 32 panels, why the reinvention was named "the soccer ball molecule".

A ball with optimum roundness is essential to obtain reliable aerodynamic - a straight flight and a controlled bounce. Our finest soccer ball, BRILLANT SUPER, has just been thoroughly tested in a wind tunnel at the Institute of Health & Sports Science at the University in Tsukuba, Japan. The results show that BRILLANT SUPER has a better aerodynamic than other top balls in the market. The ball's classic construction with 32 panels means that the ball meets resistance at a later point in its trajectory through the air, thus retaining a steady, high speed over a longer period of time. This provides a stable and more predictable flight - highly valued by all soccer players.

All of our balls today are still based on Eigil Nielsen's original invention of the 32 panel ball construction, as we never compromise on quality, playability or durability.

# THE OPTIMUM ROUNDNESS

A soccer ball with optimum roundness is essential to obtain reliable aerodynamics and superior playability.

Hidden behind the elegant exterior of the soccer balls in our Pro and Club Series is a specially developed Zero-Wing bladder made of high performance natural latex.

The Zero-Wing concept, ensures a perfectly round and balanced ball, always maintaining its shape through impact, resulting in a straight flight and a controlled bounce.

# PERFECT FLIGHT

As SELECT soccer balls have a perfect and stable flight, the trajectory of the ball is easier to estimate correctly - the player's skills determine where the ball goes - not the ball's unpredictable flight.

# DERBYSTAR by SELECT

DERBYSTAR is official match ball supplier for the Bundesliga and the 2<sup>nd</sup> Bundesliga with BUNDESLIGA BRILLANT APS.

DERBYSTAR has been a part of SELECT SPORT since 1991, building a strong position in the top football leagues in Europe through the years. DERBYSTAR is deeply rooted in the German football community with relations to elite clubs throughout the regions. The Bundesliga is among the strongest leagues in the world ranked second best by FIFA making this partnership a force in the world of football.

# LIGA NOS PORTUGAL

**LIGA**  
PORTUGAL

BRILLANT SUPER is the official match ball in the best league in Portugal – Liga Portugal.

Season 2019-2023 will feature SELECT as the official match ball supplier in all three competitions of the league: 1st league Liga NOS, 2nd league LEDMAN LigaPro and the winter championship Allianz CUP with a total of 32 teams participating in the competitions.

Liga Portugal is one of the most competitive professional championships in Europe, ranked 7th place by UEFA.

# MASTER OF EXCELLENCE

A SELECT soccer ball consists of five crucial elements:

1

PU  
SURFACE

4

ZERO-WING  
LATEX  
BLADDER

2

HAND  
STITCHED

5

DOUBLE LOCK  
VALVE

3

LINING

2

2

5

1

3

4

# HIDDEN BEHIND THE ELEGANT EXTERIOR

Common to all our balls is that the quality is high and the durability long. An optimally round soccer ball consists of 32 panels made up of 12 pentagons and 20 hexagons. The 32 panels are sewn together using 630 double stitches and 60 corner stitches and are closed off - especially for SELECT - with a doubleknot. The ball lasts longer this way.

Hidden behind the elegant exterior of the balls in our Pro and Club Series is a Zero-Wing bladder made of high performance natural latex. The concept has been developed to ensure that not only the ball but also the bladder is as round as possible. We solely use latex bladders in our pro-level and high performance soccer balls with built in balance point at the opposite side of the valve hole. This, together with the Zero-Wing concept, ensures a perfectly balanced ball with a very lively bounce.

To stabilize the ball and ensure it remains round, the 32 panels are lined with several layers of textile material. The lining helps to adjust the softness and to stabilize the panels to ensure the perfect shape of the ball.

The outer layer of the ball is made of synthetic leather in polyurethane (PU). The surface of this material can be either "shiny", "grain" or "pattern". The backside is made of either PU microfiber or normal PU fibers. Combined this gives a strong material with consistent softness

High quality is essential for SELECT. For this reason, each ball undergoes a stringent test at our production facilities in Pakistan. Here, they are tested for roundness, circumference, bounce, weight, air retention, color printing and stitching. Our standards for quality are the highest in the industry and the balls are of course tested and approved according to FIFA and IMS standards.

SELECT provides at least a 1-year stitching and roundness guarantee for each soccer ball - and a 3-year guarantee for the top ball, BRILLANT SUPER.

Ball size	Circumference	Normal weight	Light weight
3	59.5 - 60.5 cm	320 - 340 g.	-
4	64.0 - 65.5 cm	340 - 350 g.	290 - 320 g.
5	68.6 - 71.1 cm	396 - 453 g.	350 - 380 g.

A SELECT ball will last for a very long time if these instructions are followed:  
1. Straighten the ball out as best as possible.

2. Shake the ball so that the bladder is hanging loosely and vertically beneath the valve hole.

3. Allow 1 - 2 drops of SELECT valve oil to drip into the valve hole. Remember to oil the ball regularly so that the valve doesn't dry out.

4. Inflate the ball with a SELECT pump. It is important that the bladder is in the vertical position as shown here. Always remember to use the nipple.

5. Use a SELECT pressure gauge to check if the ball has the recommended pressure (see recommendation on the ball).

6. Clean the ball with a brush and tepid water. Dry the ball with a cloth. Place the ball in a ventilated room with a temperature of 59 - 68 degrees.

# THE HISTORY BEHIND THE SELECT BRILLANT SUPER THE WORLD'S FINEST SOCCER BALL

Hiding behind the exclusive exterior of the BRILLANT SUPER is a soccer ball that has been manufactured using specially developed Japanese TEIJIN microfiber. A thoroughly tested feeling of liveliness and lightness has been achieved without compromising the thickness of the material. The excellent qualities such as control and stability, which have always been main characteristics for the BRILLANT SUPER, have naturally been maintained.

The material might be Japanese but the BRILLANT SUPER is produced, as always, by our long-term supplier in Pakistan. The soccer ball is hand stitched and manufactured using high quality materials from the inside to the outside. The Zero-Wing

latex bladder by SELECT ensures that the ball is constantly balanced when traveling through the air and a Double-Lock valve keeps the ball suitably airtight.

The combination of a specially manufactured underlining of finely woven cotton and polyester, together with the ultra thin and extremely flexible microfiber, gives the soccer ball an extra softness that makes it easier to kick than before.

The extremely durable TEIJIN microfiber material ensures that the soccer ball maintains its high quality and round shape and absorbs an absolute minimum amount of water.

## BRILLANT SUPER USL

Grass \*\*\* Artificial grass \*\*\*

Our best soccer ball in high quality materials with a new powerful and cutting-edge design improves the visibility.

- Special developed Teijin microfiber synthetic leather combined with an optimized 3-layer underlining.
- Zero-Wing latex bladder gives the ball an improved and more lively bounce - and an even lighter and softer touch than before.
- The outer material and the underlying foam gives the ball a light touch and a comfortable softness.
- The construction with 32 hand stitched panels with an exclusive, golf ball textured surface for high friction and a stable flight, ensure a stable flight and that the ball stays perfect round after thousands of kicks.
- 3 year warranty

# NEW DUAL BONDED PRODUCTION METHOD

A newly developed method in soccer ball production is ready to be presented:  
Dual Bonded is the name - DB in short.

Two editions of the new production method is available in our soccer ball range this year.

The first edition our newly developed dual bonded production method is used in the new soccer ball called **BLAZE DB**.

The construction of this ball consist of a PU-material laminated with 3 mm foam. Next, two layers of textile underlining are laminated to the foam layer to add stability. The panels are then printed with 3 mm edge glue and stitched by hand. In the heat mold the glue is activated to hide the stitches. Next, the seam sealing is done by hand. The glue in the seams reduces the water uptake significantly. The bladder inside is a SR-bladder with excellent air retention. The result is a soccer ball with stability, control and a softer touch compared to other balls in the range.

The second edition is used in the production of **CLUB DB** – a new soccer ball, which is both machine stitched and sealed with glue. The construction consists of a TPU-material laminated with TPE foam. Two layers of textile underlining are then laminated to the foam layers to add stability. Finally, the panels are sealed with 3 mm edge glue and stitched together. The glue is activated in the heat mold to hide the stitches and the seam sealing is done by hand. By using glue in the sealing of the seams, the water uptake is reduced significantly.

Inside the ball, a SR-bladder with excellent air retention is chosen. The combination of both bladder and production method results in a soccer ball with a soft touch, a higher bounce and faster than the rest of our range.

## BLAZE DB

Grass ★★★ Artificial grass ★★★

Dual Bonded panels – both hand stitched and sealed with heat activated glue – for less water uptake and added durability. Subtle texture combined with a soft touch and reactive bounce for a lively feel.

- IMS and NFHS Approved Match and Training Ball

Color	Size	Item number	MSRP
White w/black/gold	5	0275251019	\$60.00

## PLAYER'S NUMBER

It's both important and expensive for every team to have good training balls. Now SELECT makes this easier - as the first in the USA - by introducing the Player's Number-concept.

On all of SELECT's most popular Club and Training balls, we have implemented a white-on-black digital 88-panel. Each player can then with a black permanent marker 'erase' the white elements of the digital 88, and thereby create his/her own Player's Number. Thereafter it's very easy to recognize his/her own ball, and get it back home after training.

# NO GRASS? NO PROBLEM

## Designed to outperform and outlast the competition on artificial turf surfaces

### Why SELECT's Turf Specific Soccer Balls?

Increasing Number of Turf Fields.

Across the country, more and more organizations are utilizing synthetic turf surfaces that claim to deliver a "grass-like" experience. There is no denying the benefits that these types of surfaces deliver to youth and adult soccer players.

However, soccer players can testify to some of the harsh characteristics of artificial surfaces:

- Synthetic surfaces can cause a standard ball to skip and roll more quickly than it would on a grass surface.
- The rubber filling and synthetic fibers can cause a standard ball to peel and rip from regular use.

### What Makes SELECT's Turf Series Different?

SELECT's commitment to innovation and quality has led to the development of the FPUG material used on SELECT Turf Series balls. FPUG is an extremely durable yet soft casing that improves the life of your soccer ball while ensuring natural playing characteristics.

ALL of SELECT's Turf Series balls are 100% hand stitched. By hand stitching (vs machine stitching or using glues), SELECT has ensured that these balls will maintain their shape and offer exceptional durability.

## NUMERO 10 TURF MATCH Grass **\*\*\*** Artificial grass **\*\*\***

- High quality soccer ball suitable for artificial grass pitches
- New and improved PU synthetic leather material with a granulated surface makes it easy to control - also under wet and moist conditions
- The ball has a 4-layer underlining and a latex bladder
- The 32 hand stitched panels ensure a straight flight in the air

BALLS**

# THE ESSENCE OF PERFECTION

A SELECT futsal ball consists of five crucial elements:

1

PU  
SURFACE

5

BUTYL  
VALVE  
covered by  
foam

2

HAND  
STITCHED

2

3

LINING

4

BLADDER

with polyester fibres  
inside

4

5

# LOW BOUNCE FOR OPTIMUM CONTROL

Common to all our balls is that the quality is high and the durability long. An optimally round futsal ball consists of 32 panels made up of 12 pentagons and 20 hexagons. The 32 panels are sewn together using 630 double stitches and 60 corner stitches and are closed off with a doubleknot - a unique SELECT feature. The ball lasts longer this way.

Hidden behind the elegant exterior of the futsal balls hides a specially developed butyl bladder with polyester fibres inside. That ensures a very reliable low bounce compared to a normal soccerball making it much easier to control. All our balls have a butyl valve inside covered by foam to avoid the bladder from puncturing when inflating the ball.

To stabilise the ball and ensure it remains round, the 32 panels are lined with several layers of textile material. The lining helps to adjust the softness and improves the contact between the ball and the foot.

The outer layer of the ball is made of synthetic leather in polyurethane (PU). The surface of this material can be either "shiny", "grain" or "pattern" and consists of lots of PU fibres. Combined this gives a strong surface with consistent softness.

High quality is essential for SELECT. For this reason, each ball undergoes a stringent test at our production facilities in Pakistan. Here they are tested for stitching, surface, roundness, circumference, weight, air retention and colour printing. Even the bladders are inflated to ensure perfect balance.

Our standards for quality are the highest in the industry and exceed FIFA's regulations for the best match balls. The balls are of course tested and approved according to FIFA and IMS standards.

	Circumference	Weight	Bounce	Approval
Futsal Super	62,5-63,5 cm.	410-430 g	55-65 cm.	FIFA QUALITY PRO

SELECT SPORT AMERICA  
IS THE PROUD SPONSOR OF:

## FUTSAL SUPER

- Preferred by numerous professional leagues, teams and players around the world
- New, colorful design for improved visibility and faster player reactions
- Exclusive developed PU material guarantees that the ball maintains its high quality and roundness after every kick
- Structured PU surface for optimal ball contact and control
- Special developed Butyl bladder with polyester fibres inside to ensure a perfect bounce, easy control and optimal air retention

Item no. 1480010100 (FIFA) Senior

MSRP: \$90.00

## FUTSAL MASTER SHINY

- New, colorful design for improved visibility and faster player reactions
- One of our most popular match and training balls made of high quality PU material
- Special coated shiny PU surface for increased passing speed
- Butyl bladder with polyester fibres inside to ensure a perfect bounce and easy control

Item no. 1480020100 (IMS) Senior

MSRP: \$65.00

## FUTSAL SPEED DB

- New futsal ball with dual bonded construction
- Colorful design for improved visibility and faster player reactions
- Match and training ball made of high quality PU material
- Special foam padding for extra soft touch and faster passes
- Butyl bladder with polyester fibres inside to ensure a perfect bounce and easy control
- The ball is hand stitched and glued (Dual Bonded)

Item no. 1480030100 (IMS) Senior

MSRP: \$65.00

## FUTSAL JINGA

- Top seller for many years due to the perfectly constructed transition between the panels making it optimal round and easy to control
- New, colorful design for improved visibility and faster player reactions
- Durable PU surface with pattern for increased speed and long lasting performance
- Butyl bladder with polyester fibres inside to ensure a perfect bounce and easy control

Item no. 1480050100 (IMS) Senior  
Item no. 1480050110 Junior

MSRP: \$40.00  
MSRP: \$40.00

## FUTSAL JINGA

- Top seller for many years due to the perfectly constructed transition between the panels making it optimal round and easy to control
- New, colorful design for improved visibility and faster player reactions
- Durable PU surface with pattern for increased speed and long lasting performance
- Butyl bladder with polyester fibres inside to ensure a perfect bounce and easy control

Item no. 1480050200 (IMS) Senior  
Item no. 1480050210 Junior

# **GOALKEEPER GLOVES AND EQUIPMENT**

# AN ANATOMICAL WORK OF ART

With the aid of an Anatomical Fit System the gloves have been designed with a slight bend according to the natural gripping position of the hand. Thus ensuring comfort, flexibility and movement of the glove in time with the speed of the fingers.

The top model 88 PRO GRIP has an elastic insert between the index finger and thumb for optimal freedom of movement. The back of the hand consists of 3 mm deep embossed soft latex in combination with a heat injection rubber pattern making the glove softer and more flexible than before. A wide wrist strap allows a feeling of stability and safety in the wrist.

The most important thing of all is of course, the palm. 3mm NOVA Grip Latex guarantees a perfect grip in all weather conditions.

The Negative glove cut is also made of latex to provide constant latex contact between the hand and the ball. The soft inner material provides optimum comfort, increases the glove's flexibility and ensures minimal water absorption when playing in wet weather.

## PERSONALIZE YOUR GLOVES

On all the gloves in our range, we have made space to print a name on the wide latex strap. Contact your local distributor for details.

## Types of cuts

### Negative Cut

A popular glove cut choice that reminds of Flat Cut. This style of cut also has gussets between the palm and the backhand. The gussets of the 88 glove are also made of latex giving constant latex contact between the glove and the ball. Negative Cut fits snugger and the fingers are held in place giving optimal ball contact when catching. This is the most common cut among professionals.

### Hyla Cut

Features the best aspects of a roll cut and a flat cut. Latex is rolled around the individual fingertips for a snug fit and feel combined with a flat style palm that gives the fingers increased comfort and breathability. The unique combination of fit and feel allows the user to have the great fit of roll finger combined with the flexibility of flat cut.

### Flat Cut

Traditional glove cut with a flat palm construction providing a larger area of contact and making the glove more flexible. This style of glove typically fits looser than many other styles with more room for the fingers. Flat Cut is the most popular cut used for finger protection gloves.

### Glove size

Measure the length of the hand as shown and find suggested sizes in the chart below.

## Latex technology

### Flexion Latex

Durable latex developed for youth gloves. Suitable for all weather conditions

### New Basic Latex

Durable latex with a fantastic grip in all kinds of weather that makes it suitable for both training and matches

### New Softy Latex

Soft and durable latex - suitable for all weather conditions. Highly recommended to pre-wet for best grip possible

### Dura Grip Latex

Soft and strong latex for all weather conditions. The latex is longlived and suitable for both training and matches

### Dura Pro Latex

Strong and durable latex especially suitable for use on artificial grass

### Elite Super Soft

High quality latex for professional matches. The glove has a perfect grip in all kinds of weather.

### Super Soft Latex

Very soft and durable latex, used for professional match gloves. Provides a good grip and optimum contact with the ball. Well-suited for all weather conditions.

### Ultra Pro Latex

Soft and hardwearing latex, especially developed for our best youth gloves, that combines durability with a fantastic grip. For all weather conditions.

### Nova Grip Latex

Top performance latex. Ideal for professional gloves. Provides a good grip in both dry and wet weather compared to other kinds of latex.

### Elite Soft Latex

Top performance latex with a good grip in all kinds of weather and great contact with the ball.

### Punch Zone

In non-sliding material for increased force and reduction of the rotary effect on the ball

### Wide wrist

Extra wide wrist strap for improved support and comfort

### Comfort

Mesh on the inside of fingers to ensure good air circulation

### Flexibility

Injection mold spiderweb design for a lightweight feeling and increased flexibility

## Protection

### Fixed guards

For reinforcement and protection of the fingers

### Latex on fingertips

For stability and impact protection

## Glove technology

### Anatomic Fit System

Ensures correct fit, as the glove is designed according to hands' natural grip position

- 20 weeks lead time from signed order and approved design
- Up to 4 colors
- Multiple stamps

# LEGENDARY SINCE 1947

SELECT Sport was founded in 1947 by Eigil Nielsen, goalkeeper for the Danish national soccer team, who devoted his life to create the perfect ball. The name of the company was given because of the exclusive leather that was specially selected for the ball production.

By producing many of the ball industry's ground-breaking creations such as the first laceless soccer ball, the first ball with 32 panels and balls made of synthetic leather, SELECT naturally became a trendsetter.

Back in 1951, SELECT signed a contract to supply balls for the Danish national soccer team. This partnership has continued ever since and is one of the longest in the history of sport. A large number of agreements with remarkable soccer federations, clubs and players have since been made.

Today, SELECT is known as the ball specialist. Our soccer balls and futsal balls can be found in more than 50 countries, and we are the world's largest supplier of handballs. More than three million different SELECT balls are produced each year through a close cooperation with Anwar Khawaja Industries in Pakistan.

We have been developing balls for 70 years, and the passion for innovative craftsmanship still lives on in our daily work. Soccer, futsal and handball matches around the world are played with balls built on Eigil Nielsen's original principle of 32 panels, just as most balls produced worldwide are based on SELECT's inventions.

**1947** Eigil Nielsen develops his first soccer ball and SELECT is born.

**1951** SELECT presents the world's first laceless soccer ball.

**1962** SELECT presents the world's first 32-panel soccer ball.

**1974** SELECT presents the world's first hand stitched PU soccer ball.

**2012** SELECT presents the world's first intelligent soccer ball, the SELECT iBall.

**2017** SELECT introduces its first Dual Bonded range of soccer balls.
