Fastskin

CARE AND USE INSTRUCTIONS

Fastskin suits are tight fitting due to compression and can take up to 20 mins to put on.

Fold out the silicone grippers on the legs of the suit before you put it on to ensure it doesn't stick to your skin.

The hips are the biggest part of the body to get the suit over and should take the longest time.

Do not pull on the thinnest parts of the suit and try to use the seams where possible. The suit needs to fit like a second skin with no air pockets.

Once the suit is fitted correctly fold down the silicone grippers and you are ready to race.

Make sure when putting on your suit you have plenty of time and keep dry and cool, sweating or rushing to get your suit on can make it harder or risk damage to the suit.

NATHAN ADRIAN

To ensure your suit lasts as long as possible and performs at its very best we ask that you take note of the following care instructions.

When putting on your suit do not pull on areas on the thinner more flexible areas of the fabric (highlighted in red). Only pull on the strong seams or the double layered fabric.

Keep away from sharp objects and long nails.

When putting the suit on try to use the pads of the fingers.

Rinse immediately in clean cold water after use. Chlorine will damage the suit over time.

86° F hand wash only with no detergent.

Lay your suit out flat and reshape it after use.

Avoid contact with direct heat. Keep away from the radiator and do not iron.

Wearing the suit for racing only will prolong the lifespan of the suit.
