

Sports Venue PADDING BY ARTISTIC COVERINGS

MULTI-SPORT

FOOTBALL • BASEBALL • BASKETBALL INDOOR TRAINING • FITNESS

Sports Venue Padding is a company committed to the safety of athletes and to fitting sports padding to the unique characteristics of your walls, fence, rails and post/columns of your facility.

Our background in the development of innovative padding solutions and team/sponsorship advertising will make us an asset to your team! Integrated Digital Printing provides a brilliant, clear image of your logo or sponsor ad that stands out with extreme durability. No chipping or peeling that is common with applied decals.

As the Technical Expert to ASTM (American Society of Testing Materials), we help define what materials and foam densities best serve an athlete making contact with sports padding while on the move.

Each facility we work in teaches us where new innovations are needed and we are recognized for our engineering and development of new solutions. Our In-House expert installation team travels to your site to take exact measurements, document all areas that will require specially built padding and come back to do the final installation.

We welcome your questions and hope to earn your business!

SLIDING GATE PADDING

Sliding Gate Pad

A creative field level solution to conceal hinges on any wall with gates, that swing into the field of play

- Great for installation on baseline, sideline or short walls where you normally see a break in the wall padding exposing the hinges
- Provides seamless look so gate locations are all the same height as aligning pads and all hinges are covered
- Slides glide easily to allow full range of motion for a full 90° opening
- Designed for all gates that swing into field of play
- Provides uninterrupted appearance and can include integrated digital printing. You can easily put graphics across the hinge area
- Specially designed commercial slides for all weather conditions

www.sportsvenuepadding.com
877.599.6855

WEDGE GATE PADDING

Automatic Wedge Field Gate Pad (Patent Pending)

Sports Venue Padding now offers a gate pad that provides safety, convenience and the ability to present continuous graphics in all gated areas of your stadium. Available in any size with or without graphics

- Designed for all gates that swing into the field of play
- Wedge pad covers and protects exposed hinges that can cause injury to the players
- Automatic hinged feature eliminates the need to manually remove vinyl cover or sewn wedge pads, attached with Velcro
- Hinged pad returns to closed position automatically when gate is closed
- Provides seamless appearance and can include integrated digital printing. You can easily put graphics across the hinge area

INDOOR TRAINING FACILITY

Indoor Gymnasium/Training Facility Padding

- Indoor wall padding is available in any height and is produced in 2' wide panels
- Many filler densities, thickness and combinations are available to meet all safety requirements
- Covers are made with an 18oz coated vinyl
- Durable backer board for attachment to walls
- Cut-outs for outlets, fire extinguishers, thermostats, 2 and 3 sided columns, drinking fountains, around indoor bleachers and any other wall features in your facility
- Wall padding options include meeting E84-NFP 101/255 fire-lifestyle safety regulations
- Can be *digitally printed with our integrated print system* with team logo's, sponsor advertising or special messages
- Complimentary design layouts let you choose the look you want

Wall Padding Mounting Options

Unless otherwise specified by customer, all standard wall pads are made with 1" lip top and bottom

Here are additional mounting options:

- 1" lip top and bottom, this is an industry standard, panels can be installed directly onto the wall using appropriate bolts
- Aluminum Wall Channel top and bottom, 3 piece framing system is best for the ability to replace individual pads
- Z-Channel top and bottom is best for wall to wall installations, no lips
- Z-Channel top and 1" lip bottom, this installation method has the best aesthetic look yet pads are secured to the wall on the bottom allowing no side to side movement for installations that are not wall to wall

www.sportsvenuepadding.com
877.599.6855

WALL PADDING CORNERS & CUT-OUTS

Wall Padding Corners & Cut-outs

- Cut-outs come in any size or shape to allow access to all wall features that cannot be covered up
- Corner pads can wrap a corner and columns along the wall space

www.sportsvenuepadding.com
877.599.6855

COLUMNS AND I BEAM PADDING

Columns and I Beam Padding

- Based on your indoor walls 3 sided columns, angled/ tapered columns or I beams require specially designed solutions to fit
- This is our specialty
- Foam filler ranges in thickness and density based on closeness of probable impact by players
- Covered in heavy weight coated vinyl
- 2 or 3 sided column pads are wood backed with durable backer board
- I beam padding is available with or without wood backing depending on location and size

Column Pads

Column pads that are unique in size and shape are considered custom. Please provide dimensions for points listed on diagram

I Beam Pads

I Beam pads can provide protection on steel columns protruding into your usable space. Installation is easy, pads fits snugly around the face of the beam and is held securely in place with self adhesive hook and loop fasteners. Standard size of pad is 8" face (A) and 6' tall (B). Custom sizes can be fabricated to your specifications.
